STEP.04 Grab the ladder with both hands and go up

STEP.05 Easy to use

STEP.06 Push up

STEP.07 Push to the position and push up to the hook

STEP.08 Space-saving and convenient to use

INSTALLATION STEPS

1

First loosen the 4 screws that fix the step, and remove the entire step

2

Place the stairs in the correct position, and use a marker to mark the position of the fixed hole

3

Use an electric hammer to make a hole at the mark, the drill bit is 12#

4

Use expansion screws to fix the frame of the stairs firmly (install at least 4 screws)

5

As shown in the picture, pull the ladder body to the frame

6

Install the two screws on the frame and it's done
