(Not all components may be included, depending upon your purchase)

HOW TO ADJUST HINGES (if required)

REQUIRED TOOLS NOT IN BOX

INSTALLATION INSTRUCTIONS

Cut hole in back of cabinet

① Installer must cut appropriately sized hole in back of cabinet to accommodate existing placement of hot & cold wall valves and drains

② Adjust the feet if needed.

③ Install the counter. Seal around the top of the cabinet with clear silicone sealant.

④ Install the mirror: use a pencil to mark the placement of the screw holes on the wall, drill the holes and insert the plastic wall anchors.

⑤ Install the screws into the wall anchors, leaving enough of the screw exposed to hang the mirror - approx 1/4" - 1/2".

⑥ Remove the handles from inside the cabinet doors and drawers and reinstall on the outside. Do not over-tighten when reattaching.
