WARNING (To reduce the risk of fire, electric shock, or personal injury):

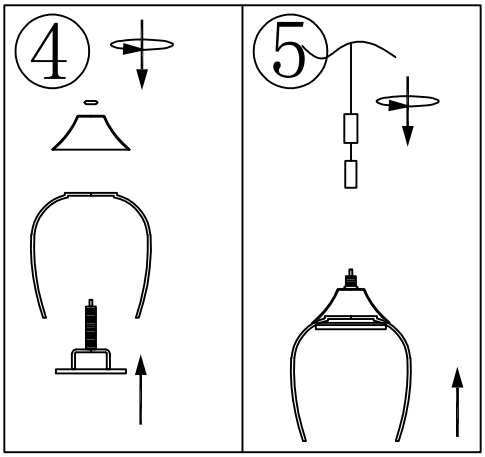

1. We suggest installation by a licensed electrician.
2. Please read the instruction carefully and save it as you may need it at a later time.
3. Before you start, NEVER attempt any work without shutting off the electricity until the work is done.
   » Go to the main fuse, or circuit breaker, box in your home.
   Place the main power switch in the “OFF” position.
   » Place the wall switch in the “OFF” position.
4. Mounting surface should be clean, dry, flat, strong enough and 1/4” larger than the canopy on all sides. Any gap between the mounting surface and canopy exceeding 3/16” should be corrected as required.
5. Make sure that the ceiling or wall can stand the weight of the lamp before installation.
6. Make sure the voltage you are using is 120V.
7. Keep the lamp away from acidic and alkaline substances in case of damaging the surface of the lamp.
8. When replacing bulbs, you should turn off or unplug the lamp and you must wait until it is cool as bulbs get hot quickly.
9. The safety instructions appearing in this manual are not meant to cover all possible conditions that may occur. I must be understood that common sense, caution and care must be used with any electrical products.

LED LAMP:AC120V/60HZ 3000K 15W

Must connect all lights,then open the power.
Because one light cannot undertake the driver.

Installation Instructions

A. Fix the hanging plate to the junction box with junction box screws,
make sure the wires pass through the reserved hole of the hanging plate. (1)

B. Connect the live wire (L) of the main wire to the positive wire (+) of the junction box with terminal caps;
similarly, connect the neutral wire (N) to the negative wire (-) with terminal caps.
Ensure no wires are exposed to prevent electric leakage.
Use the green screw to fasten the lamp's grounding wire (green wire & brass wire),
the main wire and the external grounding wire together on the ceiling plate. (2)

C. Hang the whole lamp body on the hanging plate and fasten
tightly with M4 female thread fittings to secure the lamp firmly. (3)

D. Pass the light source kit through the glass shade and metal horn fitting,
then lock tightly with the female thread washer fitting to form an integrated light source assembly. (4)
Connect the light source assembly to the male and female plug set of the lamp body suspension wire and lock it securely.
Adjust the height of the lamp body suspension wire according to actual needs. (6)
Caution: Please use this product strictly for its intended purpose,
do not retrofit or modify the product.
Any failure caused by third-party products or natural disasters is not covered by the warranty.
