

Remote reset

cut down the power supply for more than 10 seconds, While turning on the power, depress and hold the " on " button of the remote control till the lamp blinks 3 times and the remoter reset successfully.

Coding (one or group fixtures available)

cut down the power supply for more than 10 seconds, While turning on the power, depress and hold the " on " button of the remote control till the lamp blinks 3 times and the remoter reset successfully.

Important! please do NOT reset the remoter, if it works well, you can try this operation in case of Remote Controller out of work:

Switch on-wall control:
you can change the light color by switch on-off couple times
