User Manual

Assembly, Installation, Care, Maintenance, and Use Instructions

Read all instructions **BEFORE** assembly and **USE** of product. **KEEP INSTRUCTIONS FOR FUTURE USE**

YD2SQ-8X14-BK-BB & YD2SQ-9X15-BK-BB & YD2SQ-10X17-BK-BB

Customer Service: official@zupapa.us

Tel: 302-261-5366

Assembly and Installation Instructions

WARNING

1. Adequate overhead clearance is essential. A minimum of 24ft from ground level is recommended. Provide clearance for wires, tree limbs, and other possible hazards.
2. Lateral clearance is essential. Place the trampoline and trampoline enclosure away from walls, structures, fences, and other play areas. Maintain a clear space on all sides of the trampoline and trampoline enclosure.
3. Place the trampoline and trampoline enclosure on a level surface before use.
4. Use the trampoline and trampoline enclosure in a well-lit area. Artificial illumination may be required for indoor or shady areas.
5. Secure the trampoline and trampoline enclosure against unauthorized and unsupervised use.
6. Remove any obstructions from beneath the trampoline and trampoline enclosure.
7. The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.

Use Instructions

WARNING

1. Do not attempt or allow somersaults on the trampoline. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the bed.
2. Do not allow more than one person inside the trampoline enclosure. Use by more than one person at the same time can result in serious injuries.
3. Use trampoline enclosure only with mature, knowledgeable supervision.
4. Inspect the trampoline enclosure before each use. Make sure the barrier and the enclosure support (frame) padding is correctly and securely positioned. Replace any worn, defective, or missing parts.
5. Users may become entangled in or strangled by loose cords or in gaps between trampoline and enclosure.
6. Keep enclosure tightly fastened to the trampoline in accordance with the manufacturer's instructions. Failure to properly assemble and maintain a tight, secure trampoline/ enclosure boundary may result in serious injury, strangulation, or death.
7. Do not attempt to jump over the barrier.
8. Do not attempt to crawl under the barrier.
9. Do not intentionally rebound off the barrier.
10. Do not hang from, kick, cut, or climb on the barrier.

11. Wear clothing free of drawstrings, hooks, loops or anything that could get caught while using the trampoline enclosure and result in entanglement or strangulation, or both.
12. Do not attach anything to the barrier that is not a manufacturer-approved accessory or part of the enclosure system.
13. Enter and exit the enclosure only at the enclosure door or barrier opening designated for that purpose.
14. Read all instructions before using the trampoline enclosure. Warnings and instructions for the care, maintenance, and use of this trampoline enclosure are included to promote safe, enjoyable use of this equipment.

Care and Maintenance Instructions

WARNING

Inspect the trampoline before each use and replace any worn, defective, or missing parts. The following conditions could represent potential hazards :

1. Missing, improperly positioned, or insecurely attached frame padding
2. Punctures, frays, tears, or holes worn in the bed or frame padding
3. Deterioration in the stitching or fabric of the bed or frame padding
4. Ruptured springs
5. A bent or broken frame
6. A sagging bed, or
7. Sharp protrusions on the frame or suspension system

About the ladder

WARNING

1. Ladder lets young children climb onto trampoline.
2. Trampolines not for children under 6 years.
3. Do not use ladder if children under six might be nearby.
4. Remove when trampoline is not in use.

IMPORTANT

- If you have any questions, suggestions, and (or) comments, please feel free to contact us at your earliest convenience. Zupapa® Customer Happiness Executives are standing behind to help all the time. You are promised to receive a reply in 24 hours.
- Check the Spam, your Message Settings if you do not receive a reply as it probably is blocked. Our Customer Happiness Executives will always get back to you no later than the timeframe.

Important Warning

- Do not use or stand near the trampoline in windy or gusty conditions. A trampoline can become airborne when exposed to sustained wind or gusting wind conditions. This can result in serious injury, paralysis, or death, as well as property damage.
- To reduce these risks, disassemble the trampoline and enclosure and store them until weather conditions improve. Anchoring a trampoline frame may prevent the trampoline from moving as a result of the wind but even anchored trampolines can become airborne or damaged.

This user manual applies to Zupapa® Rectangle Trampolines in Zupapa® reserves the right to change, update any contents included without noticing in advance. You can always search for the latest version online.

Read, understand, and follow this user manual before assembling and using the trampoline. Save this manual for future reference. It's the responsibility of the owner and the jumper for potential risks of injuries due to inappropriate use not obeying safety instructions in this manual.

01 ZUPAPA by MaxLead

Brief

Our philosophy is to help the family members to PLAY together, ENJOY more family time, and strengthen the BOND. Since the early 21st century, we have served hundreds of thousands of families with high-quality trampolines, dome climbers, hammocks & stands, baseballs & nets, paddle boards, swings, and gymnastic bars. We never slow down our pace to expand the business – we are continuously working hard with carefully selected partners to provide more safe and reliable products that can deliver joy and health to more families.

Our Purpose

We aim to accompany all kids to grow up healthy both physically and mentally and create valuable memories for generations.

Our Vision

To be the preferred trustworthy brand in recreational sports and leisure activities.

Our Product

Zupapa® Rectangle Trampolines, with the top quality and performance at a price enabling most families to enjoy the bounce, are one of the most outstanding products in the market. Certificated by ASTM F381-24 (U.S.), made of reinforced hot-dip galvanized tubes, they deliver a safe jumping area for every family's backyard. You will also receive all essential tool kits in your order.

NOTE: You can tell a Zupapa® Rectangle Trampoline from a Zupapa® Saffun trampoline by the location of the springs and the safety net. Springs are out of the safety net for Zupapa® Rectangle trampolines, while springs are inside the safety net for Zupapa® Saffun trampolines.

Our Service

Standing behind the excellent products is the industrial-leading after-sales service. We provide a hassle-free warranty for all Zupapa® products, please do not hesitate to reach out to Zupapa Customer Happiness Executives. We will try our best to work it out for you. Zupapa is a sub-brand of MaxLead.

SAFETY INSTRUCTIONS 02

Trampolines, especially backyard trampolines, make it easy to enjoy bounce at home. However, the risk of injuries accompanies as with any kind of sports. To enjoy the Zupapa® Rectangle trampolines, whether you are the owner, supervisor, or jumper, you should read, understand, and practice all instructions before using the trampoline. Warnings and instructions for the care, maintenance, and use of this trampoline are included to promote safe, enjoyable use of this equipment.

Supervisor

Supervisors need to understand and enforce all safety rules and guidelines, provide knowledgeable advice and guidance to players, and ensure that they are informed. If supervision is unavailable or inadequate, players should not be allowed to use the equipment.

⚠ WARNING

- Ensure the jumper(s) are within the weight limit when playing on the trampoline.
- Inspect the trampoline before each use for bent tubes, torn mat, loose(broken) springs, and overall stability of the trampoline. Replace any worn defective or missing parts.
- Small children should be assisted when getting in(off) the trampoline.
- Do not allow any jumpers to start bouncing on the trampoline unless you've inspected it and ensure it's in good condition.
- Do not place the trampoline indoors, on concrete floors, hard ground (e.g. rock), or slippery surfaces.
- Do not place any objects on the trampoline while anyone is playing on the trampoline.
- Do not allow any activity underneath the trampoline.
- Do not allow somersaults.
- Beware of weather conditions and do not allow use on rainy, windy, or snowy days. Do not use or stand near the trampoline in windy or gusty conditions. A trampoline can become airborne when exposed to sustained wind or gusting wind conditions. This can result in serious injury, paralysis, or death, as well as property damage. To reduce these risks, disassemble the trampoline and enclosure and store them until weather conditions improve. Anchoring a trampoline frame may prevent the trampoline from moving as a result of the wind, but even anchored trampolines can become airborne or damaged. Consult a qualified contractor to determine what type of anchor works best in your location.
- Properly secure the trampoline when not in use. Protect it against unauthorized use. If a trampoline ladder is used, the supervisor should remove it from the trampoline when leaving the area to prevent unsupervised access by children under 6 years of age.

- Keep objects away which could interfere with the performer. Maintain a clear area around the trampoline.
- For equipment information, contact the manufacturer.
- For skill training information, contact a trainer certification organization. For information concerning skill training, contact a certified trampoline instructor.
- For additional information concerning the trampoline equipment, contact the manufacturer.

Jumper

Jumpers should read, understand, and practice all safety tips and guidelines before using the trampoline.

WARNING

- Use trampoline only with mature, knowledgeable supervision.
- Do not use the trampoline while under the influence of alcohol or drugs.
- Do not smoke, eat, or drink when using the trampoline.
- Do not chew gum, sweets, etc. when using the trampoline.
- Do not hold any objects in your hand when using the trampoline.
- Do not wear hard-soled shoes (for example, tennis shoes), watches, jewelry, or other accessories when playing on a trampoline because it will cause excessive wear on the mat.
- Do not try difficult maneuvers until you have mastered the previous maneuver.
- Do not attempt or allow somersaults (backward or forward) on the trampoline. Serious injuries, paralysis, or death may result. Landing on the head or neck can cause serious injury or death even when landing in the middle of the bed.
- Do not step directly onto the frame pad or grasp the frame pad. Place your hand on the frame and either step or roll up onto the frame, over the springs, and onto the trampoline mat.
- Learn fundamental bounces and body positions thoroughly, initially, you should get accustomed to the feeling and bounce of the trampoline. The focus must be on the fundamental of your body position. You should practice each bounce (the basic bounces) until you can do and control it at ease.
- Stop bounce by flexing knees as feet come in contact with the bed. Learn this skill before attempting others. This technique should be practiced while you are learning each basic bounce. The braking skill should be used whenever you lose balance or control of your jump.

- Keep each of your bounce in control. Ensure your take-off point is the same as the landing point. Never move up to the next bounce without mastering the previous, or you'll increase your chances to get injured.
- To stop your bounce, bend your knees when you land on the mat with your feet.
- When getting off, move over to the side of the trampoline and place your hand onto the frame as support, and step from the mat to the ground.
- Do not allow more than one person on the trampoline at a time. Use by more than one person at the same time can result in serious injuries.
- For use by children under 6 years of age. Trampolines over 20 in. (51 cm) tall are not recommended.
- Avoid bouncing too high. Maintain control. Stay low until bounce control and repeated landing in the center of the trampoline can be accomplished. Control is more important than height.
- While keeping the head erect, focus eyes on the trampoline toward the perimeter. This will help control bounce.
- Avoid bouncing when tired. Keep turns short.
- Learn fundamental bounces and body positions thoroughly before trying more advanced skills. A variety of trampoline activities can be carried out by performing the basic fundamentals in various series and combinations, performing one fundamental after another, with or without foot bounces between them.

Jumping

Jumpers should also practice the following important guidelines to ensure safe bounces.

WARNING

- Do not attempt to crawl under the barrier.
- Do not intentionally rebound off the barrier.
- Do not hang from, kick, cut, or climb on the barrier.
- Do not attach anything to the barrier that is not a manufacturer-approved accessory or part of the enclosure system.
- Enter and exit the enclosure only at the enclosure door or barrier opening designated for that purpose.

WARNING

- Do not use the trampoline when it is wet, damaged, dirty, or worn out. Bounce only when the surface of the bed is dry. Wind or air movement should be calm to gentle. The trampoline must not be used in gusty or severe winds.
- Do not use the trampoline if there are pets, kids, or any objects underneath the trampoline.
- Do not use the trampoline without attaching the frame pad. Tie the frame pad down before each use.
- Do not use the trampoline as a device to bounce onto or into another object.
- Do not jump into (off) the trampoline.
- Climb on and off the trampoline. Do not use the trampoline as a springboard. Do not jump into (off) the trampoline. It is a dangerous practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. Do not use the trampoline as a springboard to other objects.
- Do not get off by jumping off the trampoline and landing on the ground, even if it's a grassland.
- Do not attempt to somersault.
- Do not bounce recklessly on the trampoline because it will increase your chances of getting injured.
- Do not bounce on the trampoline for extended periods because fatigue can increase your chances of injury.
- Keep all objects that could interfere with the jumper away from the trampoline.
- Bounce in the center of the bed.
- Keep your eyes on the mat to maintain control. If you do not, you could lose balance or control.
- Beware of what is overhead, underneath, and around the trampoline. Jumpers should also practice the following important guidelines to ensure safe bounces.

04 PLACEMENT

Trampoline Assembly

▶ Scan me!

Before assembling, you should find a safe area to place the trampoline. Measure your yard to find out how much space you have. Keep the following two parameters in mind

- The minimum space required overhead the trampoline is 24 feet (about 7.3 meters) ;
- The minimum space required around the trampoline is 8.2 feet (about 2.5 meters).

Please also follow the dos and don'ts as below:

! WARNING

Dos

- Ensure the place is clear of any obstacles including but not limited to debris, walls, fences, branches, slopes, and electrical power wiring;
- Ensure the place is flat and even. If the ground is not level, never try to make it serve as the jumping area;
- Install the trampoline in a well-lighted area;
- Install the trampoline on the lawn without obstacles underneath, surrounded, and overhead because it keeps the trampoline stable and firm from sliding with traction as well as protects the jumper from severe injuries in case of falling;
- Adjust somewhere a little uneven (only applicable for the place where the rise / gradient is no more than 3 degrees across the whole space) if you have to place the trampoline there.
- Remove any obstructions from beneath the trampoline and trampoline enclosure.
- The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.

! WARNING

Don'ts

- Do not install the trampoline on hard ground such as driveway, asphalt, or concrete;
- Do not install the trampoline on a hill or anywhere the slope is greater than 3 degrees across the whole space.

05

ASSEMBLY

Trampoline Assembly

▶ Scan me!

! IMPORTANT

Do not move the trampoline from one place to another after the assembly unless you've disassembled it.

Please read the assembly instructions before starting your work. You can also search for the video tutorial.

Before Assembling

1. At least two people are required for the trampoline assembly;
2. Check and confirm you have all labeled parts according to the chapter Parts List. If you need any replacement(s), feel free to contact Zupapa Customer Happiness Executives with the ORDER NUMBER, PART NUMBER, REQUIRED QUANTITY for each part, and photos or video clips (if applicable) ;
3. Do not forget to wear gloves and use the Spring Loading Tool (#15) provided in the package. The owner and the installer should take responsibility for any injuries if they forget to wear and use;
4. Ensure all parts are dry before the installation.

Customer Service: official@zupapa.us Tel: 302-261-5366

Assembly and Installation Instructions

Check assembly instructions of the frame, frame pad, trampoline mat, safety net from here.

! WARNING

- Adequate overhead clearance is essential. A minimum of 24 ft from ground level is recommended. Provide clearance for wires, tree limbs, and other possible hazards.
- Lateral clearance is essential. Place the trampoline and trampoline enclosure away from walls, structures, fences, and other play areas. Maintain a clear space on all sides of the trampoline and trampoline enclosure.
- Place the trampoline and trampoline enclosure on a level surface before use.
- Use the trampoline and trampoline enclosure in a well-lighted area. Artificial illumination may be required for indoor or shady areas.
- Secure the trampoline and trampoline enclosure against unauthorized and unsupervised use.
- Remove any obstructions from beneath the trampoline and trampoline enclosure.
- The trampoline enclosure is only to be used as an enclosure for a trampoline of a size for which the enclosure is designed.

❗ REMINDERS:

Please pay particular attention to ensuring all parts are numbered and graphically indexed as shown on the Parts List below, as does the quantity for each position. If you need any help, please **CONTACT THE SUPPORT TEAM** with the **ORDER NUMBER REQUIRED PARTS (NAME, QUANTITY, AND PART NUMBER)**, **PICTURES (OR VIDEO CLIPS, IF APPLICABLE)**, we'll get back to help out soon.

STEP 1 - FRAME INSTALLATION

Frame Installation Example Diagram

1.1 Support Assembly

Picture1

As shown above, connect the two 42mm L-shaped Legs (#6-1) to a 42mm V-shaped Leg Base (#7-1) using four M8 Screws (#23). Ensure that the V-shaped protrusion of the leg base faces upward. Assemble the other set in the same manner.

Picture2

As shown above, connect the two 38mm L-shaped Leg (#6) to a 38mm V-shaped Leg Base (#7) using four M8 Screws (#23). Ensure that the V-shaped protrusion of the leg base faces upward. Assemble the other set in the same manner.

Note: In Picture 1, the two support legs after installation are the middle support legs of the trampoline frame. In Picture 2, the two support legs after installation are the side support legs of the trampoline frame.

1.2 Top Rail Assembly

Picture3

Connect the two Top Rails with Leg Sockets (#4) to the assembled legs from Picture 1, noting that the support legs have a tube diameter of 42mm.

Picture4

Connect the Left L-shaped Top Rail (#3) to the frame assembled in Picture 3

Picture5

Connect the Right L-shaped Top Rail (#3-1) to the Top Rail with T-Connector (#5). The other set should be connected in the same way.

Picture6

Connect the frame structure installed in Picture 5 to the frame in Picture 4.

Picture7

Install the support legs from Figure-picture 2 (note the tube diameter is 38mm) onto the frame assembled as shown in Picture 6.

Please note that the Top Rail with T-Connector (# 5) and 38mm L-shaped Leg (# 6) should always be kept perpendicular to the ground

Picture8

Install the other frame as shown in steps 5 to 7 of the pictures.

The installed structure is shown in the Picture.

STEP 2 SPRING LOADING INSTRUCTION AND ATTACH THE TRAMPOLINE MAT TO THE FRAME

NOTE: Due to the manufacturing process, the electrophoretic spring coils may feel sticky and produce a clicking sound when first pulled. This is normal.

Picture9

Connect the Jump Mat with Net(#1) to the trampoline frame by attaching a spring to the Circle-ring closest to each corner. Note For easy spring installation, use a Special Spring Tool(#15) to hook onto the one you are installing.

Picture10

Connect the Electrophoresis Springs(#14) with the V-ring/Circle-ring and the aligned hole on the main frame. Please use the Spring Loading Tool(#15) and ensure the hook of the springs is facing down.

⚠ IMPORTANT Pay careful attention to hand position when connecting tubes and handling springs.

Picture11

Note It is important to have someone work across from you. Otherwise, the springs could become over-extended, causing them to become difficult to connect. The tension needs to be distributed evenly for the net to be installed correctly. Gently tap down against the spring if the hook is not completely in the hole. Springs will create high levels of tension when assembled. Please take care not to pinch your fingers.

Important: Do not install each adjacent spring in turn, or you'll find it's getting harder to attach the springs, even unable to attach it in the end.

Picture12

Attach the remaining until all all springs are placed and secured firmly.

STEP 3 SPRING PAD ASSEMBLY

Properly tie down the Frame/Spring Pad before each use as per the steps below.

⚠ WARNING

- Never use the trampoline without attaching the frame pad.
- Do not use the trampoline even if there's only one spring / V-ring damaged or missing.

Picture13

Cover all the metal parts including the steel frame with the Spring Pad.

Picture14

Tie the black webbings sewn (on the inner arc of the pad) the steel V-rings / Circle-rings.

Attach the hook of the elastic strap to the V-rings / Circle-rings circling around the outside of the top rail frame.

Picture display after installation.

STEP 4 - NET POLES AND NET ASSEMBLY

Install the all Tube Cap(#18) onto the four Steel Upper Net Pole with Foam(#8) and four Y Shaped Upper Net Pole with Foam(#8-1)

Place the Curved Lower Net Pole with Foam(#11) over the middle leg of the trampoline frame and secure it in place. Firmly Bolt Set(#12) the Lower Net Pole(#11) to the hole of the trampoline 42mm L-shaped Leg(#6-1). Use Spanner(#17) and Allen Wrench(#20) to tighten the Bolts Set(#12).

After successfully assembling the first pole, repeat the operation while maintaining order, and install the other 3 lower poles.

Install the Picture 16 assembled upper Net Pole(#8) to the Lower Net Pole(#11) as shown. (Note that the groove corresponding to the upper rod faces the inside of the trampoline).

Picture20

Connect the Upper Net Pole (#8-1), the Medium Net Pole (#9), and the Straight Lower Net Pole (#10) together; the remaining poles should be assembled in the same way.

Picture21

Please ensure the orientation of the gathered pole (connected by #8-1, #9, & #10) is set before securing it with the Clamps Set (#13). The correct orientation can be confirmed by ensuring the concave side of the upper net pole faces inwards towards the trampoline. Then, use the Clamps Set (#13) to secure the four Gathered Poles (connected by #8-1, #9, & #10) to the Legs (#6) at each corner of the trampoline. Note that the clamps set should be attached at both the upper and lower parts of the legs.

Please note that the Straight Lower Net Pole with Foam (#10) and 38mm L-shaped Leg (#6) should always be kept perpendicular to the ground.

Picture22

Picture display after installation.

Picture23

Connect the snap on the top of the safety net with the Tube Cap (#18) as shown.

Picture24

Picture display after installation.

STEP 5 - SECURE THE LEG BASE BY LAWN STAKE

Picture25

Get the Leg Base (#6 & #6-1) stuck on the ground by inserting the Lawn Stakes (#16) into the lawn, to avoid the risk of accidents occur. Every Leg Base (#6 & #6-1) has one lawn stake to fix.

STEP 6-LADDER ASSEMBLY

Trampoline Ladder Assembly instruction

PARTS LIST		
Item	Description	QTY
a	Hook Tube	2
b	Leg	2
c	Step	3
d	M6 Screw Set	6

Attach the Ladder to the Frame

Hang the ladder on the frame which closes to the zipper. (Note: The responsible adult supervisor must re-zip the zipper and re-hook all the hooks securely before jumping begins.)

As shown in the picture, the assembly of the ladder is completed. If you have any questions with this step, please contact us, we will solve it for you within 24 hours.

STEP 7-BASKETBALL ASSEMBLY

7.1 Hang the ladder on the frame which closes to the zipper. (Note: The responsible adult supervisor must re-zip the zipper and re-hook all the hooks securely before jumping begins.)

7.2 String the 2 long steel tubes through both sides of the blue basketball board sleeves. Finally connect the two long steel tubes at the top.

7.3 Unfasten the buckles of the baskets.

7.4 This step requires two people to stand on the ladders and assembly the basketball board to the net poles.

7.5 Connect the #27 Straight Steel Tube and #8-2 Steel Upper Net Pole with the button.

7.6 First tighten and tie the white ropes on the top of the net sleeves. Then wrap the net sleeves with basketball board sleeves, and finally tighten and tie the white ropes at the bottom of the basketball board sleeves.

7.7 Attach the black velcro on the top of the enclosure net to the black velcro on the bottom of the basketball board.

7.8 Congratulations, the assembly is completed!

06

DISASSEMBLY

To disassemble the trampoline, follow the assembly instructions through **Step 1 - Step 6** in reverse order.

! Attention

- At least two adults are required for the disassembly.
- Wrap all connector points with weather-resistant tapes (duct tape).

07

CARE & MAINTENANCE

With proper care and maintenance, Zupapa® trampolines are capable of providing your family with many years of fun and enjoyment. We recommend you follow regular maintenance as per the guidelines below.

Care

Using, disassembling, and store the trampoline correctly as per the following

- Inspect, clean, and wash your trampoline mat with a garden hose every two weeks;
- Remove any sharp objects before using the trampoline;
- Ensure there are no leaves, debris, mildew, or bird droppings on the trampoline before using the trampoline;
- Jumpers should either wear socks or be barefoot when using the trampoline;
- Keep your trampoline away from any fire sources such as a grill;
- Do not allow pets or animals to get inside the jumping area;
- Store the trampoline in a dry area with good ventilation when it's not in use.

Maintenance

Always inspect the trampoline and replace any worn, overused, damaged, or missing parts before each use as they increase the chances of getting injured. Be cautious of the following conditions :

- Punctures, holes, or tears in the trampoline mat;
- Sagging trampoline mat;
- Loose stitching or any kind of deterioration of the mat;
- Bent or broken frame parts, such as the legs;
- Broken, missing, or damaged springs;
- Damaged, missing, or insecurely attached frame pad;
- Protrusions of any types (especially sharp types) on the frame, springs, or mat;

Inspect the trampoline enclosure before each use and replace any worn, defective, or missing parts. The following conditions could represent potential hazards :

- Missing, improperly positioned, or insecurely attached barrier or enclosure support system (frame) padding and pole caps;
- Punctures, frays, tears, or holes worn in the barrier or support system (frame) padding;
- Deterioration in the stitching or fabric of the barrier or support system (frame) padding;
- Bent or broken support system (frame) ;
- Sagging barrier;
- Sharp protrusions on the support (frame) or suspension system.

If any of the conditions mentioned above or something else that you feel could cause harm occurs, disassemble the trampoline, or at least secure the trampoline with a lock or heavy tarpaulin to prevent unauthorized use. Reuse the trampoline only after you've replaced the broken parts.

Special Conditions

The owner (or supervisor) should also pay attention to special conditions as below

WINDY CONDITIONS

The trampoline is possible to be blown away in high winds. When you expect windy weather, disassemble the net poles and the safety net, then tie the top frame (round, outside portion) of the trampoline to the ground with ropes and stakes. Keep it in mind at least three (3) ties should be used to ensure security and do not just secure the trampoline legs to the ground, or the frame sockets would be pulled out.

WINTERIZATION

Although you can use your Zupapa® trampoline in winter if you keep cleaning them regularly and avoid snow stocking, we highly recommend you disassemble and store the equipment in a dry area with good ventilation. In any condition, do not forget to put on the rain cover when it's not in use.

08 LIMITED WARRANTY

The Zupapa® Rectangle Trampoline's limited warranty as shown below takes into effect from the purchase date, covering the materials and the workmanship under normal use and service conditions.

- ♦ We offer ten(10) years of warranty for the frame;
- ♦ We offer two(2) years of warranty for the trampoline mat, frame pad, safety net, and Electrophoresis Springs;
- ♦ We offer a lifetime warranty for other accessories not mentioned above.

IMPORTANT

The order number and photos or video clips(if applicable) are required for your warranty application.

Part Name	Frame	Trampoline Mat	Frame Pad	Safety Net	Galvanized Springs	Other Accessories
Warranty (Years)	10	2	2	2	2	Lifetime
• Replacement(s) for other accessories can be applied free of charge at ANY TIME. • Damages caused by weather (including but not limited to winds, rains, snow) are excluded from the warranty.						

You can either contact Zupapa Customer Happiness Executives or the retailer with the inquiry details, order number, and pictures or videos(if applicable) if you need to claim for the warranty.

IMPORTANT TIMEFRAME

Check **the Spam**, your **Message Settings** if you do not receive a reply in 12 hours after sending out the email because Zupapa® Happiness Executives always reply no later than the timeframe after receiving your inquiry.

09 BASIC SKILLS

Skill Lessons

⚠ WARNING

All jumpers, regardless of ages and skill levels, should be supervised.

Lesson Plan

Practice the following lessons to learn basic steps and bounces. It's the responsibility of the owner (or supervisor) to help the jumper to read, understand, and practice these lessons before actually getting on and using the trampoline.

LESSON 1

Warming-up: Discuss and demonstrate body mechanics and trampoline guidelines.

1. Demonstrate proper (dis)mounting techniques.
2. Demonstrate and practice the basic bounce.
3. Demonstrate and practice to stop on command.
4. Demonstrate and practice hands and knees moving. Stress should be given on the four-point landing and alignment.

LESSON 2

Warming-up: Review and practice techniques learned in **Lesson 1**.

1. Demonstrate and practice the knee bounce. Learn the basic down to the knee and back up before trying a half twist to the left and the right side.
2. Demonstrate and practice the seat bounce. Learn the basic seat bounce, add a knee bounce, and a hand-and-knee repetition.

LESSON 3

Warming-up: Review and practice all the skills and techniques learned before.

1. Demonstrate and practice the front drop. Important All learners should keep the prone position (face down on the ground) while the instructor tries to correct the faulty positions that could cause injury.
2. Start with a hand-and-knee bounce and then extend the body into the prone position, land on the mat.
3. Practice the routine hand-and-knee bounce, front bounce, seat bounce, and back to feet.

LESSON 4

Warming-up: Review and practice all skills and techniques learned before.

Learn about half-turn bounce as follows.

1. Start from the front drop position and make contact with the mat, push off with your arms in either the right or left direction, and turn your head and your shoulders in the same direction.
2. Keep your back parallel to the mat and your head up during the turn.
3. Land in the front drop position after completing the turn.

Jumpers can develop their routines after learning, practicing, and mastering the lessons above. However, they are not allowed to skip these basic skills before moving into more difficult, complicated bounces.

Never skip basic skills before moving into more difficult bounces.

Basic Trampoline Bounces

Basic Bounce

1. Start from the standing position with feet shoulder-width apart and eyes on the mat.
2. Swing your arms forward and up in a circular motion.
3. Bring feet together while in mid-air and point toes downward.
4. Keep feet shoulder-width apart when landing on the mat.

Knee Bounce

1. Start from the standing position with feet shoulder-width apart and eyes on the mat.
2. Land on knees while keeping your body erect and your back straight. Do not forget to use your arms to keep a balance.
3. Bounce back to the starting position.

Seat Bounce

1. Start from the standing position with feet shoulder-width apart and eyes on the mat.
2. Land in a flat sitting position with legs parallel to the mat and hands beside your hips.
3. Return to the erect position by pushing up your hands.

Front Bounce

1. Start with the front bounce position.
2. Land in the prone position (face down) with your hands and arms extended forward on the mat.
3. Push off the mat with your arms returning to the standing position.

180 Degree Bounce

1. Start with the front bounce position.
2. Push off with your left (or right) hand and arms (depending on which way you wish to turn).
3. Maintain your head and shoulders in the same direction, keep your back parallel to the mat and head up.
4. Land in the prone position by pushing up your hands and arms to the standing position.

10 APPENDIX

Zupapa Product Categories

OUTDOOR TRAMPOLINE

Not any kid can refuse the bouncing fun! Zupapa® Safump & Safump outdoor trampolines are the ultimate gift idea for your kids, making the backyard a safe jumping playground for years.

SMALL TRAMPOLINE

Are you looking for a perfect place for your preschool and school-age boys and girls to free up their energy? Try a Zupapa trampoline for small kids with the basket hoop, which is a great combination of safety and fun!

FITNESS TRAMPOLINE

No space? No problem! Zupapa's fully foldable trampoline transforms any room in seconds. Stores anywhere - under beds, in closets, even car trunks.

Built tough with high-carbon steel to safely hold 550 lbs. Ultra-quiet bungees protect your joints while absorbing 85% impact. Adjustable handle fits all users.

Set up in just 5 minutes with pre-assembled parts. Your perfect workout is now this portable-bounce healthy, bounce happy!

DOME CLIMBER

It's the safety, reliability, and versatility that make Zupapa® dome climber stand out from the same category. The heavy-duty construction enables up to 6 kids to play together - they can climb, dangle, or play underneath, making your backyard an exciting playground that will entertain your kids for years.

MONKEY BARS CLIMBING DOME WITH HAMMOCK

The Zupapa® Indoor Climbing Dome redefines active play by blending superior safety with endless fun. Crafted from upgraded, thickened PP plastic, its robust 36mm frame confidently supports multiple children at once, with a remarkable 300 lbs capacity.

Unlike metal sets, its rust-proof, non-metal design features rounded edges for the safest play environment, completely free from sharp corners and corrosion risks.

Proudly part of the MaxLead family
