User Manual

Dear Customer

Thank you for choosing our fountain product. Please read this manual carefully before use to ensure the correct installation and use of your fountain.

Product Lists

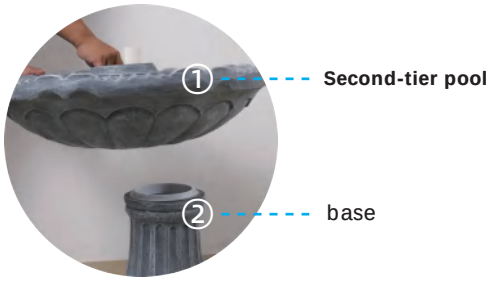

Second-tier pool x 1 | base x 1 | First-tier pool x 1 | Connecting Column x 1 | Top part x 1 | cap x 1 | Back Door x 1 | water pump x 1 | Fountain packaging box x 1 | water pump packaging box x 1

1. Preparation Before Installation

Choose a flat location free from falling leaves for placing the fountain, ensuring that the power cord can easily reach an outlet.

2. Installation Steps

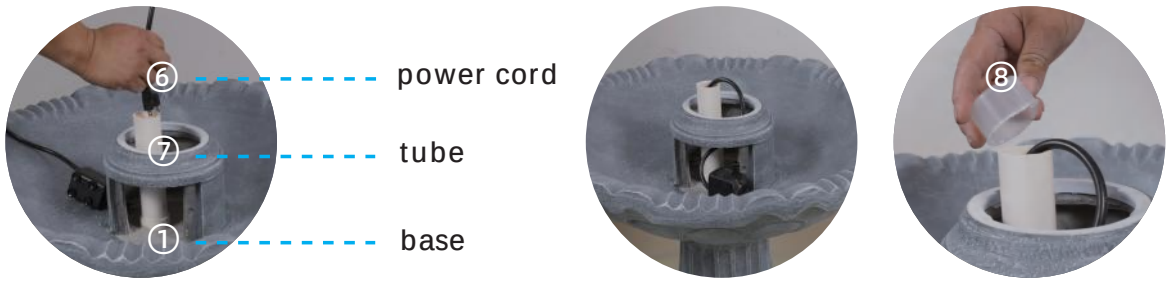

a: Align the clips of the **Second-tier pool** (①) with the base (②), then rotate the basin to securely lock the clips in place.

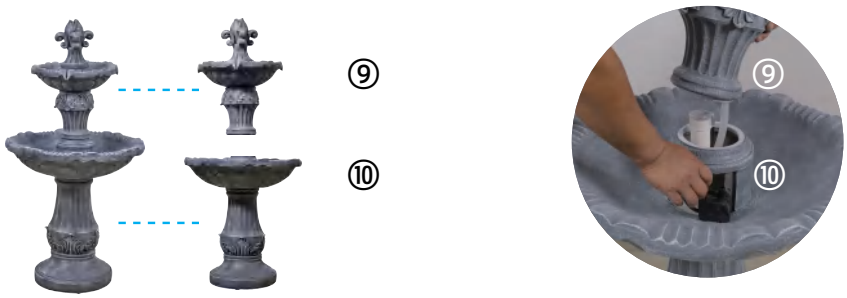

b: Align the connecting column (③) with the first-stage basin(④) , then rotate the basin to securely lock the clips in place,
And pass the top part (⑤) of the water pipe through the hole

c: Pull the water pump power cord (⑥) through the opening of the lead tube (⑦) and into the hole beneath the base (①), Cap the conduit (⑧)

d: Link the upper (⑨) and lower parts (⑩) of the fountain, then rotate the basin to securely lock the clips in place.

d: Securely connect the hose ( ) to the water pump( ), insert the water pump into the secondary basin notch, and close the back door ( ).

3. Filling with Water and Powering On

1: Gently pour water into the reservoir until the water pump is fully submerged.

2: Plug in the power, wait a moment, and enjoy the flow of your fountain.

Troubleshooting

If pump does not run, the following should be checked

1. **Checking the circuit breaker, then try another outlet.**
2. **Check the water level in the fountain. Running the pump without su□cient water can damage the pump.**
3. **Check the setting of the flow control on the pump.**
4. **Check the pump discharge and intake for dirt and debris.**
5. **Check the fountain feature tubing for kinks and obstructions.**
6. **Is the pump air-locked? Plug and unplug the pump several times to clear it.**

NOTE:

1. **To eliminate the possibility of water damage around your fountain, check for leaks and excessive splashing after the initial setup of your fountain. It is highly recommended that this fountain is placed in an area where it cannot be damaged.**
2. **Adjust the pump volume and flow to achieve the desired effect. Splashing may occur if the flow rate is too high. The rate can be increased or decreased by moving the flow rate control slider on the pump body. Moving the slider towards '+/ Max' will increase the water volume, and moving it towards '-/Min' will decrease it. On some types of pumps, the flow regulator may be turned clockwise or counterclockwise, or slid side-to-side to adjust the flow.**
3. **Caution: Excessive weight or pressure on any of the fountain sections may cause it to fall. Keep pets, children, or anyone from sitting, leaning, or climbing on any of the fountain components.**
4. **Clean with damp cloth. Do not use any chemicals to clean as they may ruin the finish.**

Safety Warnings and General Information

- **Do not use the appliance with a damaged power cord or plug.**
- **To avoid hazards, ensure that any electric cable is safely out of the way of children and pets.**
- **Where possible, ensure all power cables are positioned away from high-tra□c areas.**
- **It is important that an RCD (Residual Current Device) is present and any product of this type is connected to it.**
- **Before removing, repositioning, or replacing the water pump, turn off the power and unplug the unit.**
- **Always use the original power cable supplied with the product.**
- **Make sure the voltage on the rating label matches the mains power supply to be used.**
- **The water temperature must not exceed 35°C. Top up the water levels frequently during hot weather.**
- **In very low temperatures, drain, dry and protect the water feature from frost, snow and ice.**
- **This product is designed for outdoor use only and should not be positioned where water spillage may damage carpets or furnishings.**
- **Always place the fountain on a flat, level surface.**
