Product Model : L038002-T1G	Product Size (MM):D110*H115	Color Rendering Index (CRI) : Ra ≥ 90
Rated Voltage/Current : 5V/1A	Rated Power : 1W	Color Temperature : 3000K.4000K.6000K
Battery Capacity : 2000mAh	Light Source : LED	

Packing List: User Manual * 1PC, USB-C Charging cable * 1PC, Lamp * 1PC

Function Description

1.Component Name :

Usage

1. Control mode: Touch the switch key by hand, in turn: turn on the light - warm light - neutral light - white light - long press for dimming - turn off the light.
2. Working time: about 5 hours at the brightest setting and about 15 hours at the dimmest setting.
3. Charging time: It takes about 7 hours to charge when the light is off, and the indicator light turns off once charging is complete.
4. The low-voltage light will gradually dim during use until it runs out of power and turns off.
5. When the light does not respond, connect the charger first to charge, and use it after charging for a few minutes.
6. Use a 5V1A charger. Do not use a power supply that exceeds the rated range. Using a power supply outside the rated range may cause damage to the lamp.

Lamp Usage And Maintenance

⚠ Warning: Before maintaining and servicing the lighting fixtures, the power must be cut off to prevent electric shock.

1. Please keep the surface of the transparent lampshade clean to avoid affecting the lighting effect of the lamp. If the transparent lampshade is stained with dust, please clean it thoroughly gently wipe off the velvet cloth.Please
2. do not use alcohol, gasoline or other chemical agents to wipe the lamps, otherwise the lamps may discolor or be damaged.
3. The structure of the lighting fixtures cannot be changed arbitrarily. Any damage or personal injury to the lighting fixtures caused by improper use or self modification is prohibited. The merchant shall not be held responsible.

Precautions

1. When the light does not turn on after turning on the power, please confirm whether the lamp has sufficient power.
2. When the lighting fixture is working, do not look directly at the LED to prevent damage to vision!
3. If the lamp is not used for a long time, it should be charged at least once every 20 days.
4. This lamp is a non user replacement light source lamp, and the light source inside this lamp should be provided by the manufacturer Or its service agent or someone with similar qualifications can replace it.
