

Instructions for PLATFORM BED KING

Parts:

(2) BED ENDS - 70"

(4) BED RAIL - 80"

(28) REGULAR SLAT - 35"

(4) CONNECTOR SLAT - 35"

(2) LEFT LEG - 15"

(2) RIGHT LEG - 15"

(2) CENTER LEG - 14"

H A R D W A R E L I S T

H-21	2 - 1/2" BOLT		24
H-3	CROSS DOWEL		24
H-10	HEX WRENCH		1
H-20	1 - 1/2" WOOD SCREW		16

#2 PHILLIPS HEAD SCREW DRIVER REQUIRED

1

Align a Left Leg and Right Leg so that the rail pockets are on the front. Turn the Bed End so that the pocket holes are facing the front. Then push the dowels into the holes on the legs. Repeat for the other Bed End.

Use a phillips screw driver to attach the Legs to the Bed End using (4) 1 - 1/2" Wood Screws (H-20). Repeat for the other Bed End.

2

Use 2 - 1/2" Bolts (H-21) and Cross Dowels (H-3) to attach Bed Rails to the Bed Ends. The pockets in the Bed Rails should be facing in and open to the top.

Leave all bolts loose until everything is attached. Then tighten all bolts.

NOTE:
Rail pockets must face the inside.

3

Use (8) 1-1/2" Wood Screws (H-20) to attach one Center Leg to the center of each of the two middle Bed Rails.

H-20

Note:

The Wood Screws are self-tapping so they do not need pilot holes.

4

Insert (4) Connector Slats into the pockets that have holes. Secure using 2-1/2" Bolts (H-21) and Cross Dowels (H-3). Leave these loose at this time.

H-3

H-21

Next insert all Regular Slats, then tighten the 2 - 1/2" Bolts (H-21).

PLEASE RETIGHTEN
BOLTS
AFTER 30 DAYS

This futon frame is made with Tulip Poplar. Any green tint in the wood will change to light brown in a few weeks. This will happen in 20 to 30 minutes if placed in direct sunlight. Tulip Poplar can be left unfinished, clear finished, stained, or painted. I prefer the lighter stains over the darker ones because the wood is fairly porous. My favorite is a clear finish with no stain. Satin polyurethane (oil or water based) works well.

Painting: It is best to start with an interior primer and lightly sand before painting.

Staining: Lightly sand before staining. Wipe stain on with a rag until you get the desired color. If you are going to use a top coat (such as polyurethane), do not sand again until after the first coat, and then be careful not to sand away the stain.

Finishing: All finishes work well with Tulip Poplar. A simple wax finish over stain (Minwax for example) is easy. An oil finish such as Danish oil can be used. Or a clear top coat such as polyurethane works well to seal the wood. With polyurethanes, the first coat acts as a sanding sealer. So you should lightly sand (180 - 220 grit sandpaper) after the first coat, wipe the wood clean, and then build up coats for the desired effect.
