

BACKS ARE REMOVABLE FOR EASY DELIVERY!!

To assist the in-home delivery process, it is recommended that you remove the furniture backs to reduce carry weight and increase clearance/mobility around doors and household obstacles.

STEP 1:

Rotate the furniture forward and separate the hook and loop fastener securing the back cover.

STEP 2:

Locate the KD bracket (pictured) securing the back frame to the mechanism/seat assembly.

STEP 3:

Use a tool (ie., flat screw driver head) to gently pry the locking tab as pictured and pull the back frame away from the furniture.

With backs removed, the furniture can now be easily maneuvered through narrow doorways in the home.

Caution!! This furniture is restricted by tie-downs, these must be removed prior to use.

STEP 1:

Lay the piece of furniture onto its back to allow access to the hardware tie-downs.

STEP 2:

Carefully remove the hardware tie-downs with scissors in each reclining section.
