What will you need?

Phillips head screwdriver

Flat head screwdriver

Hammer

A flat, smooth surface. You can use the cardboard of the box or a rug.

An electric screwdriver isn't necessary, but it can make the work much easier :)

I'll be with you while you assemble this desk.

Where should you start?

This is so IMPORTANT!

Over the next few pages is the panel and hardware content for this desk.

Please make sure that the quantity of each one is correct, and that everything is in good shape.

(When the desk is already assembled there's no warranty for this)

Panel quantity

A - x1	B - x2	C - x2	D - x2
E - x2	F - x1	G - x1	H - x1

What's in the hardware bag?

			
Wood dowel x29	Spreading bolt x18	Minifix cam x18	Cover caps x30
			
Flat Head Screw x8	2" Drywall Screw x10	Corner Brace x4	

Be careful!, try not to lose anything from this bag, its content is necessary for assembling your desk.

How do the dowels and Minifix system work?

this is so important too!

Everytime you're using one of these connectors during the assembly, you should follow these same steps.

Wood dowels

They are little wooden cylinders.

Put in the dowel inside the indicated hole and softly hit it until it's fully inside.

When joining two panels together, don't forget to gently hit the panels to adjust the joint.

Minifix system

It's a joint compound of two parts: a spreading bolt and a Minifix cam.

This is a Minifix cam. It has a little arrow on its upper surface.

This is a spreading bolt. You should put it with the black plastic part facing down.

You should insert these cams with the little arrow pointing towards the drilling on the panel's edge (shown on the left).

After joining two panels together you should turn the cams 180° with a phillips head screwdriver to adjust and secure the joint.

But don't go yet!

There are some
recommendations left for you
