

Assembly Instructions for Exercise Pens

1. Do NOT leave young animals unsupervised for extended periods of time.
2. Be sure to remove the collars and tags from your pet before placing it in the exercise pen to prevent possible entanglement.

Parts Identification

1- Exercise Pen
(8 connected panels)

8 - Ground Anchors

3- Snaps

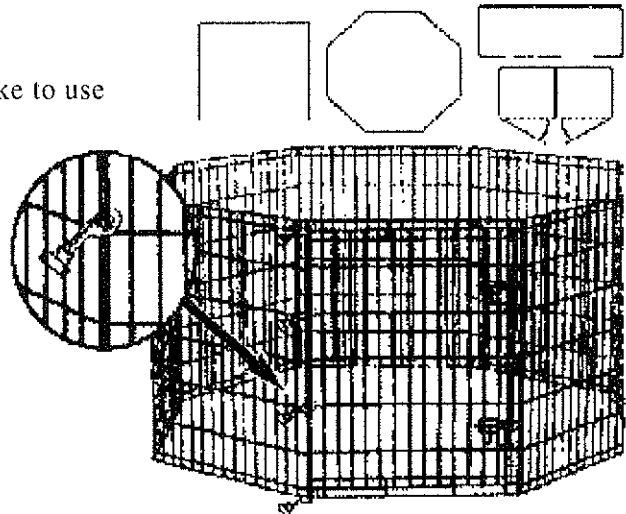

Assembly Instructions

- 1 Remove contents of the packing carton. Locate the Exercise Pen (8 connected panels), the Ground Anchors & Snaps.

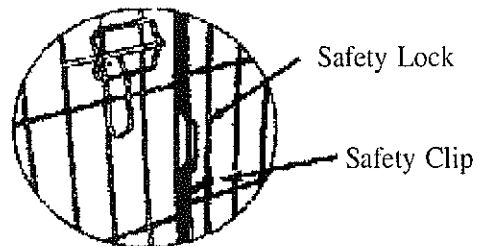

- 2 The Exercise Pen can be set up in many different configurations. Decide what configuration you'd like to use and set up the pen. *(Note: The pen can be moved and reconfigured after it has been assembled.)*

- 3 Connect the two ends with the Snaps as shown in Illustration 2. For best results, place Snaps at top and bottom between the two closely spaced wires and space the remaining two Snaps evenly along the middle wires.

- 4 For added safety, install a Ground Anchor at the intersection of each panel. See Illustration 3. *(Note: Illustration is not shown to scale, and Snaps and other details have been eliminated to more clearly illustrate the Ground Anchor.)*

- 5 Secure pet inside Exercise Pen by closing the door and securing both slide-bolt latches. Be sure the door closes over the safety lock and both latches are properly secured. For added security, fasten the safety clip.

IMPORTANT INFORMATION !

1. Be sure to remove the collars, tags and leads from you pet before placing it in the home to prevent possible entanglement.
