- Lifespan: 50,000 hours
- Voltage: 120V
- 5-6 In. Eyeball LED Downlights
- cETLus, Energy Star & FCC approved
- 5 years warranty

With a recessed base, the 5/6 inch the LED eyeball dimmable downlight of 15W available in 3000K and 5000K color temperatures helps beam angle adjustment (the beam angle being 100-degree) like the movement of an eyeball -- a unique feature that allows for light to be distributed in areas where it is required the most. A CRI of 90+ means excellent color rendering by this downlight when the objects and surfaces appear as natural as they would in natural light. This 15W eyeball LED downlight can conveniently replace 100W of dimmable halogen light. On an average, the dimmable LED Downlight cuts down your utility bill by almost 88% and that's a significant amount of energy savings.

## SPECIFICATION

MPN	Wattage	Voltage	Lumens	CCT	Beam Angle	CRI
DW003	15	120V	1000	3000-5000K	120°	>90

## MODEL VARIATION

- Nowhere you will find any dark spot when using this dimmable LED downlight in its full non-dimming mode. The light distribution is uniform and even with the light spread at a wider beam angle.
- The dimmable LED downlight utilizes a wide beam angle of 120-degree to illuminate large spaces when your objective is to have a non-directional light. The distribution of light is in such a way that no specific objects are highlighted and rather the light distribution is uniform and even.

## WARNING AND CAUTIONS

- The product must be installed according to the instructions. Installed by a person familiar with the product, production and product hazards.
- Avoid fire and electric shock. When installing the lighting fixtures, you need to understand the electrical characteristics. If you are not sure, do not attempt to install. Please contact an electrician.
- Understand the structural features and dimensions of lighting before installation.
