

Outdoor Furniture

IMPORTANT

If you have any problems with this product (missing or damaged parts, assembly issues, etc.),

PLEASE DO NOT RETURN TO THE RETAILER/STORE

from where you purchased the product.

To expedite any future warranty claims, please retain the instruction sheet, warranty, and receipt for future use.

Care and Maintenance

Store furniture in an upright position. Be careful to never allow water to build up in frames as this will cause corrosion and freeze damage in cold climates. Wash all frames with a solution of mild soap and water. Rinse with clean water and dry with a soft absorbent cloth towel. Frames can be treated with a liquid wax for maximum protection against UV rays and/or salty, damp air. If your set includes cushions, slings, and/or an umbrella they may be cleaned by hand with a solution of soap and water with a clean water rinse. Never machine wash cushions, slings or umbrella covers as this will result in shrinkage or damage. After cleaning cushions tip on end and allow to drip dry. Never use a commercial or home dryer to tumble dry fabric goods. Do not use bleach or solvents to clean any product! This will void the warranty.

CARE & MAINTENANCE

Outdoor furniture can be enjoyed for many years when well maintained.

Regular Maintenance

Wash the furniture with a solution of mild detergent and water, rinse with clear water, and dry thoroughly. To all metal frames, apply a fine, clear automobile wax for maximum protection against harmful ultraviolet exposure and salt air.

For best protection, perform this maintenance two or three times per year in low pollution areas or more frequently in high pollution areas. Please note that these durable materials can be safely cleaned as often as desired. Note: Some suntan and sun block products may be harmful to resin, cushions and strap, mesh and vinyl lace and strap. Do not allow such products to come in contact with any seating surfaces to avoid deep penetrating stains, which are not covered under warranty.

How to Clean & Care for Teak Furnishings

Left alone to age, the natural color of teak furnishings will weather to a soft, silver grey. This process will take approximately nine months, depending on the degree of sunlight and rain exposure. Imperfections, which are inherent properties of the wood, will show over time, enhancing the beauty of the furniture. In humid or wet climates, or after rains, the wood may naturally expand and contract, causing the grain to rise. This is to be expected with exposure to the elements and will stabilize after the initial weathering occurs.

To maintain teak furnishings, use a soft bristled utility brush and stroke lightly in the direction of the grain to remove surface dust. For more stubborn dirt, the wood may be washed with a mild solution of four parts laundry detergent or dish washing soap to one part bleach in water, then rinsed thoroughly and allowed to dry completely. Oiling the wood may cause mildew or irregular coloring.

How to Clean Woven Furnishings

Woven furnishings are made of durable and weatherproof extruded polyethylene resinweave. Light stains and soils may be removed with a solution of mild detergent and water, rinsed with clear water and dried thoroughly. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant. Woven furnishings may not be suitable for intensely hot climates.

How to Clean Fabric

Fine outdoor fabrics are designed to endure years of sun, soil and moisture. Wash outdoor cushions with a solution of mild detergent and water and thoroughly rinse with clear water. Stand cushions on end and allow to air dry completely. Light stains can be removed as above. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant. Note: Do not dry clean or use a washing machine or dryer. Do not steam or use water at temperatures above 100° F when washing. Note: Be careful to keep the outdoor furniture cleaner from contact with the cushions of your outdoor furniture, as it will cause discoloration. Do not use bleach on printed acrylic fabrics. Do not use solvent-type materials on woven vinyl, woven blend or ultra woven blend fabrics as they will damage the yarns. Do not use chlorine based cleaners.

How to Clean Mesh

Remove light stains with a solution of mild detergent and water, then rinse with clear water and dry thoroughly. Mildew and heavy stains can be removed with a quality commercial outdoor furniture cleaner and protectant. How to

How to Clean Strap

For general or light cleaning, begin by brushing dirt off the strap. Apply a solution of mild detergent and warm water and allow it to soak into the strap. Gently clean with a sponge or soft bristle brush, then rinse thoroughly with clear water and allow the strap to air dry.

How to Clean Vinyl Strap

Apply a quality vinyl protectant to guard against the effects of air pollution, salt air build-up, and mildew. To remove difficult stains use rubbing alcohol applied with a soft cloth.

How to Clean & Care for Stone and Marble Tops

Tabletops are designed for normal outdoor use in residential settings. To maintain the natural beauty we recommend applying a stone-enhancing sealer every six months to protect and restore the top. This step can be repeated each year and before the winter season.

If tabletop is stained with products such as wine, soda, coffee, or other colorants of organic origin, clean these spills immediately with a mild detergent then rinse with water. In extreme cold climates, it is recommended that tabletops be stored in a dry indoor area or be covered with suitable outdoor furniture cover. Be sure to allow space between the tabletop and the cover so that moisture does not collect on the table; this will promote airflow and allow moisture to escape.

PARTS LIST

PART#	DESCRIPTION	PICTURE	Q'TY
A	Chair Body		1
B	Chair Back		1
C	Seat Cushion		1
D	Back Cushion		1

Assembly Steps

Step 1. Place chair back (B) at a slight angle to align the locking brackets on the chair back (B) with the locking brackets on the chair body (A). See inset on figure 1.

(Figure 1)

Figure 1

Step 2. Lower back (B) onto the chair body (A) insuring that the locking brackets on the chair back (B) and the chair body (A) are completely engaged. To check that the chair back(B) is properly installed, stand behind the chair and pull up on chair back (B). If one or both locking brackets move out of position they are not properly engaged. Remove chair back and repeat steps 1 and 2. See figure 2.

(Figure 2)

Figure 2

Step 3. Put the seat cushion(C), back cushion(D) on the recliner frames. See figure 3. Now your recliner is ready to use.

(Figure 3)

Figure 3

Warning- To prevent product damage:

Damage will occur to the mechanism, if the leg rest is forced closed from the 2nd position. The leg rest must be returned to the 1st position and then closed.

To Operate the Leg Rest:

- 1. The recliner chair is equipped with a two-position locking leg rest for customized seating comfort. Simply put physical strength on the back and armrest to extend the recliner mechanism. You may stop in any one of two positions. The closed position is for relaxing reading(Figure 4). The 1st position is slightly inclined for comfortable viewing(Figure 5). The 2nd position is slightly more incline for comfortable sleeping(Figure 6).**
- 2. Bring the back upright by closing the leg rest before getting out of the unit.**
