

Purchase Date: ____ / ____ / ____ Order/Customer Reference Number: _____

Thank you for choosing us. We stand behind our brand and the quality of the items we sell.

Replacement parts or products will be sent at our discretion within the 1-year warranty period. Proof of purchase, with the date of purchase as well as photos of the merchandise defect, must be provided.

Photos are used to determine the cause of defects and for future quality control.

If you have any questions, comments or concerns, feel free to contact us by phone or email.

SOLAR HANGING LIGHT

Read this manual carefully and follow the care instructions. Save this document for future reference.

Clean the solar panel from time to time

Do **NOT** place in shaded areas

Do **NOT** charge the solar panel behind glass

HOW SOLAR LIGHTS WORK

During the day, the solar panel converts solar energy into electricity and stores it in the rechargeable battery. At night, the light turns on automatically via a light detecting sensor built into the unit. How long the light illuminates will depend upon the location of the light, weather conditions, and how much direct sunlight the unit is exposed to.

Ensure the power is switched to 'ON' while charging.

CHOOSING THE RIGHT LOCATION

- Select an outdoor location where the solar panel will receive at least 6-8 hours of full, direct sunshine each day. Ensure tree, shrub, or building shadows do not shade the solar panel throughout the day as this will influence the charge of the battery and shorten the working time at night.
- Avoid locations with strong nighttime light sources, such as street or porch lights, as it may cause the light to turn off due to the light detecting sensor receiving too much ambient light.

RECHARGEABLE BATTERY

The battery, like all rechargeable batteries, has a limited life span, and become less efficient with repeated charge/discharge cycles. As the capacity of the battery reduces over time, you will notice reduced operating time and will need to replace the battery.

IMPORTANT: Only use compatible rechargeable batteries, alternatives may be incompatible which may damage the system and will void the warranty.

OPERATION

1. Turn the power on the solar panel 'ON'.
2. Place the solar glazing globe in a location that will receive 6-8 hours of full, direct sunlight.
3. First Time Use: The solar panel will require at least 8 hours of full and direct sunlight to charge the battery. Make sure the unit is turned 'ON' while charging.

CLEANING

Gently wipe down the entire unit with a soft, damp cloth. Do not put pressure on the solar panel while wiping down the unit as this may damage the panel.

REPLACING THE BATTERY

1. Unscrew the chain from the center of the solar panel.
2. Remove the metal and rubber washers from the rod.
3. Carefully lift the solar panel off the rod and place the solar panel face-down on a soft, clean surface.
4. Use a screwdriver to remove the battery cover. Carefully remove the battery.
5. Paying attention to the positive and negative terminals, gently insert the new battery.
6. Replace the battery cover, place the panel and washers on the rod and screw the chain onto the rod.

⚠ IMPORTANT INFORMATION ⚠

USE & CARE

- For outdoor use only.
- Keep the solar panel clean by gently wiping it with a soft cloth. Clean solar panels will absorb more sunlight.
- Never use chemicals or abrasive materials to clean the unit.
- Store indoors during freezing weather. Remember to turn the unit off before storing.

TROUBLESHOOTING

- Ensure the power button is in the 'ON' position.
- This product was designed to only work at night, make sure the solar panel light sensor is not receiving too much ambient light.
- If the light only works for a short period of time, attempt a 'Boost Charge':
 - Turn the power 'ON' and let it charge in full, direct sunlight for at least 8 hours.
 - Turn the power 'OFF' at night to conserve the battery.
 - Repeat this process for 2-3 days. If the unit still does not work, the battery may need replacing.

This product uses a rechargeable battery. When the battery can no longer be used, it should be removed from the unit and recycled. The battery must not be incinerated or composted. Recycle the battery in accordance with local laws and regulations.

Any modification to the product or failure to follow recommended care will void the product warranty.
