

Assembly & Installation Instructions

PREPARATION before INSTALLATION:

1. If an existing fixture is being replaced, remove it and note to which wire in the outlet box the original fixture was attached.
2. Before discarding the carton, double-check the packaging to make sure all parts have been found.
3. This fixture was designed to be mounted on an octagon outlet box. The box must be securely mounted to the structure of the building.

IMPORTANT:

1. **WARNING** - Disconnect power before relamping or wiring the fixture. Turn off the entire electrical circuit to which the lighting fixture is attached.
2. Installation and maintenance of this fixture should be completed by a licensed electrician.
3. Failure to install the fixture correctly could result in serious injury or death.
4. Read all instructions before starting installation.

INSTALLATION STEPS:

Step 1: Mount Bracket

Secure the mounting bracket to the U.S. standard junction box using the mounting screws.

Step 2: Connect Wires

Connect the fixture wires to the pre-installed wires in the junction box using wire connectors:

- Black(L) to Black (Live/Hot);
- White(N) to White (Neutral);
- Ground(G) wire to the grounding terminal.

Caution: Ensure no wires are exposed during the wiring.

Step 3: Attach Ceiling Canopy

Use decorative nuts to secure the ceiling canopy onto the mounting plate.

Step 4: Install Bulb

Install the bulb (bulb not included).

Step 5: Attach Lower Threaded Stud

Install the lower threaded stud onto the fixture body as shown in the diagram.

Step 6: Install Acrylic Panel

Thread the acrylic panel and rubber gasket through the threaded stud, then use the decorative nut to firmly secure the acrylic panel to the fixture body.

Step 7: Power Test

Turn on the power and verify that the bulb is functioning properly
Installation is complete
