

## Installation steps:

1. Adjust the lamp cap in the direction of the arrow
2. Place the sleeve on the lamp cap
- 3-4. Insert the A/B light arms into the holes on the middle seat in a staggered manner, and then tighten and fix them with nuts
5. Connect the lamp holder wire of the same color to the main line of the same color
6. Tighten the hollow tube on the center seat
- 7-8. Put the lid on the center seat and tighten the smooth nut
- 9-11. Secure the boom to the light body
12. Fix the lifting ring on the boom
13. Snap the movable buckle into the lifting ring and tighten it
14. Tighten the lifting ring on the mounting support
15. Fasten the mounting bracket to the junction box with screws
16. Connect the main line and ground cable of the lamp body to the cables reserved on the junction box
- 17-18. Cover the mounting bracket with the canopy and tighten the ring to secure it
19. Install the bulbs. (Bulb not included)

## Notice:

1. Before installation, please check whether the parts are complete and whether the lamps are in good condition.
2. Cut off the power supply before installation, and then perform wiring.
3. Install the lamp body first, and then install the power supply.
4. Installation and maintenance must be carried out by professional and technical personnel.
