Expandable Barrier

Item	Qty	Icon
M5* 35 stainless steel screws + M5 stainless steel locking nut	4	

Installation method:

Step 1: Unpack the product and take out the product and the caster base. Place the retractable guardrail on a table with a certain height for installation.

Step 2: The brackets need to be tucked into the side posts of the product and the holes in the brackets aligned with the holes in the product and tightened with M5*35 screws to ensure they do not come loose. It is then ready to be placed on the floor and used.

Attention: Keep hands and fingers out of moving diamonds of web when handling gate.
