- 1 * Storage Rack (800A, 1000C Excluding Storage Rack)

1 * Installation Instruction

(As this product is made of stainless steel, please wear gloves during installation to avoid scratches)

1. Place the four support legs into each of the four holes on the upper plate and secure them with short screws.

2. Place the lower plate at the position shown in the above picture and secure it with long screws (curved washers are used here).

3. Place the square and round basin in the position shown in the picture.

4. Put on the storage rack to complete the installation. The above figure is a schematic diagram of the completion of the product installation.
