

## User Guide for WPC Wall Panels

- Regularly dust the panels with a soft, dry cloth or a microfiber duster to keep them clean.
- Cleaning only with a soft damp cloth without any chemicals or cleaning agents.
- Do not use abrasive cleaners, bleach, ammonia, or other strong chemicals, as they can damage the surface.
- Gently handle the edge of the product.
- While the panels are water-resistant, avoid prolonged exposure to excessive moisture, which can cause harm to the product.
- Avoid direct and prolonged exposure to sunlight, as this could cause the panels to fade over time.
