

# Solar LED Umbrella

## How Solar Lights Work:

During the day, the solar panel collects sunlight and converts it into electrical power stored in the rechargeable battery included. At night, the photosensor built to the solar panel, sensing the absence of light. Turns on the solar light automatically using the electricity stored by the day. The more sunlight the fixture gets, the stronger the charge will be and the longer your fixture will illuminate at night.

## Preinstallation:

- Ensure the mounting location for your solar light allows the solar panel to receive a full day of direct sunlight
- Do not install in shady areas as this will significantly reduced performance at night.
- The lamp should receive a minimum of 8 hours of direct sunlight per day for optimal performance at night.
- Be sure the location is not near the ambient light from other light sources during evening hours. These light sources may affect the photosensor and cause the lamp to turn off.

## Package Contents

PART	DESCRIPTION	QTY(PC)
A	Umbrella Frame with Canopy	1
B	Bottom Pole	1
C	Solar Panel	1

## Assembly and Installation

**Step 1:** Insert the plug into the socket under the solar panel. Then, insert the bottom pole into the umbrella frame

**Step 2:** Put the solar umbrella in direct sunlight to charge the batteries for 8 hours before the first use.

**CAUTION:** YOU MUST CHARGE BATTERY BEFORE FIRST USE. Please note that battery can discharge if they are left unused or uncharged for a long period of time. Since there can be a six-month period between production and final customer purchase, we recommend you charge your solar umbrella for at least 8 hours in direct sunlight before the first use. Failure to charge the battery will result in premature dimming of the lights in your new solar umbrella. For everyday normal use, turn the light switch on at night when you want to use the solar light and turn off the switch after use. MAKE SURE THE LIGHT SWITCH IS IN THE OFF POSITION AND IN DIRECT SUNLIGHT FOR THE SOLAR PANEL TO RECHARGE THE BATTERY

**Step 3:** To open the umbrella, turn the crank handle in the clockwise direction until the canopy is fully open.

**Step 4:** Press the light switch to turn on/off the solar lights. Switch located at the end of one of the canopy ribs.

**Step 5:** To close the umbrella, the main pole must be in the upright position, then continue to crank counterclockwise or opposite direction to close umbrella. Use tie straps to secure canopy.

## Maintenance

- Periodically clean the solar panel with a wet cloth. Do not apply any solvents or chemicals.
- Remove batteries if umbrella's solar function light is not used for long periods of time.

**DANGER:** Keep children out of the assembly area during assembly.

**WARNING:** Read the entire instructions before beginning and follow the steps outlined. Failure to assemble and install as instructed could result in the umbrella tipping over causing personal injury and/or property damage.

**WARNING:** Do not use this umbrella during periods of high winds and rain. Failure to do so may result in personal injury and/or damage.
