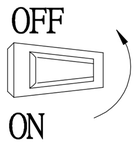
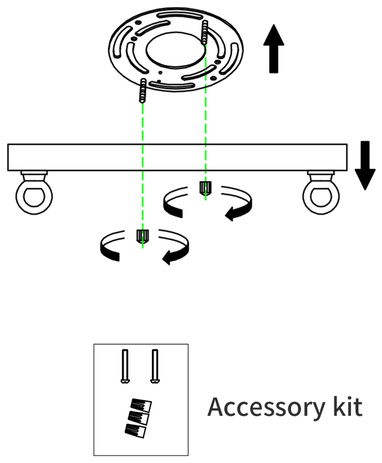
Installation Steps:

①



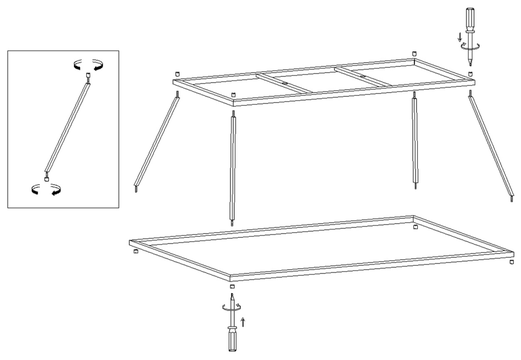
1. Turn off the power.

②



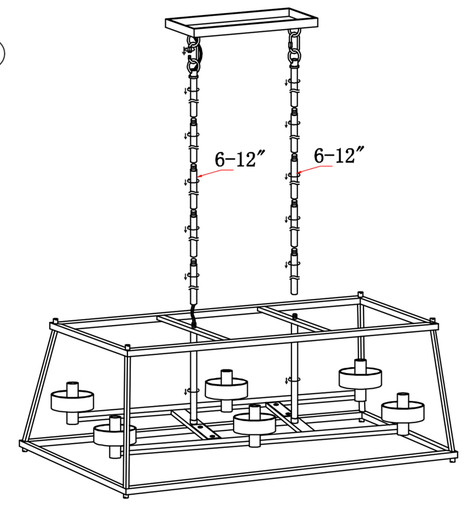
2. Unscrew the two plates and then install the two accessories (F)

③



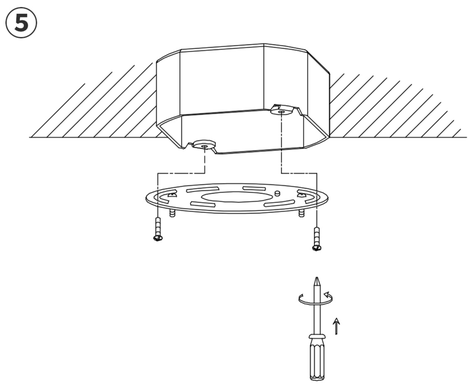
3. First unscrew the decorative grain on the square tube (L), then align the square tube (L) with the holes of the upper frame (K) and the lower frame (M), fix the square tube (L) with accessories (J), debug the parallelism of the upper and lower frames and then tighten the machine wire (B) with a screwdriver. The main frame assembly is completed.

④



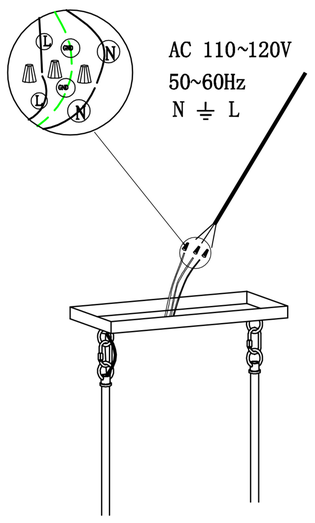
4. side of the power cord are required through the six straight pipe (I), the last one must be a straight pipe with a hanging ring (H). Twist the straight pipe from bottom to top, twist it to make sure the power cord passes through the middle of each pipe, and finally set the movable buckle (G) into the hanging ring of the square box (E) with the hanging ring of the straight pipe and twist it tightly. The installation method is the same for both sides.

⑤



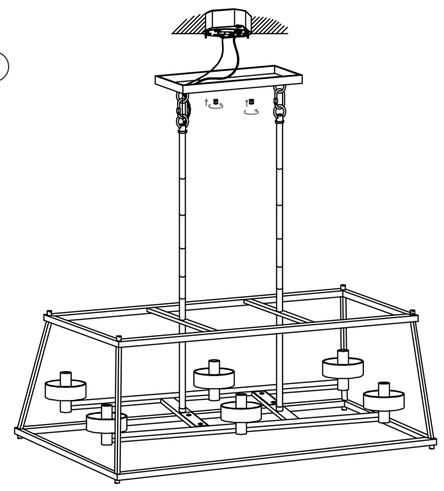
5. Use two machine wire (B) to tighten the pegboard (D) with the junction box (A) and install the pegboard (D).

⑥



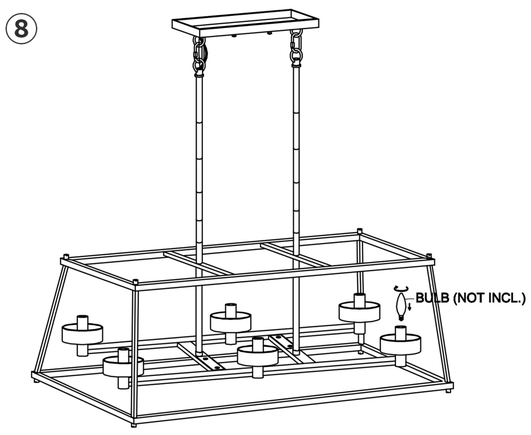
6. Correspond and connect the positive, negative and ground wires with the power line, and wrap the terminal cap (C) with adhesive tape.

⑦



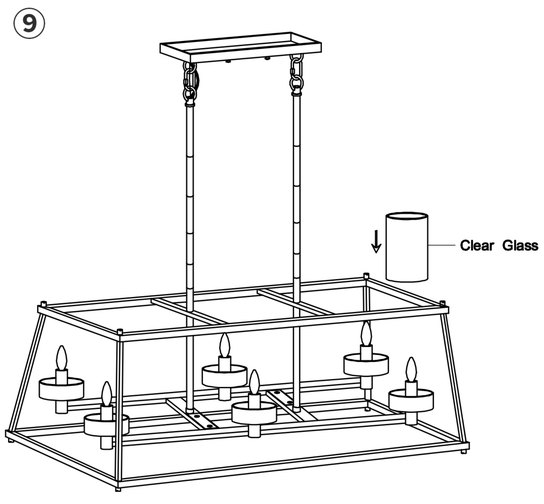
7. Lift the whole lamp upward, align the two holes on the square box (E) with the machine wire (B) on the pegboard (D), then tighten the fittings (F) and hang the lamp holder.

⑧



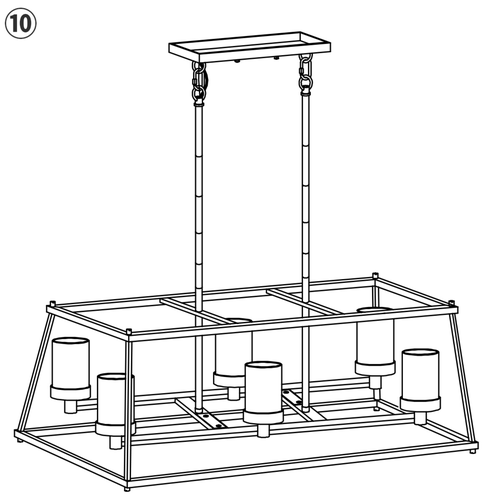
8. Install the bulb.

⑨



9. Install the glass cover (Q).

⑩



10. Finish the installation and turn on the light.
