

Assembly Guide

Installation Guide

QYXZZ - Multi-functional Shoe Cabinet (with Boot Compartments)
Bamboo Wood / Original Life / Small Furniture

Parts List (Taking the style of clear doors with stripes as an example)

Door Panel Installation

1. Take out the door panel and install it with small screws and the hinges.

2. Take out the hinges and fix them on the door panel with small screws.

Hook Installation

Take out the hooks and install them on baffle B with small screws.

Installation Tips

1. Please operate strictly in accordance with this assembly instruction manual.
2. Please carefully check whether the parts inside the packaging are complete and intact.
3. Please clean the surface of the shoe cabinet only with a rag or a slightly damp cloth. Please do not scrub vigorously.
4. Using un-matching accessories may damage the product. Please confirm the model number of the accessories before installation.

Installation Steps

1. Take out the left side bracket, ordinary shelves, and the large top shelf. Install the large top shelf with large screws (align the grooves of the shelves and the side brackets).

2. Take out the small shelf and install it with large screws.

3. Take out the vertical strips and install them with large screws.

4. Take out the small shelf and install it with large screws.

5. Take out the back panel and insert it along the grooves.

6. Take out the right side bracket and install it with large screws.

7. Take out baffle A and install it with large screws.

8. Take out baffle B with installed hooks and install it with large screws.

9. Take out the small top shelf and install it with large screws.

10. Take out the door panel and fix the hinges on the shelf with small screws.

11. Take out the hinges and fix them on the side bracket with small screws.

12. Install the other door panel in the same way.
