

Sink Item Details

 Sink*1		 Shelf Support Tube *2		 Drainer*1	
 Front Upper Support Tube*2		 Side Support Frame *2		 Shelf Round Tube*4 /Towel Bar*1	
ACCESSORIES	 Adjusting Foot(A)*4		 Screw/Nut(B)*16		 Downpipe*1
			 Hexagon Wrench(C)*1		
		 Glove*2			

Installation Instructions

1. Attach adjusting feet to both side support frames.

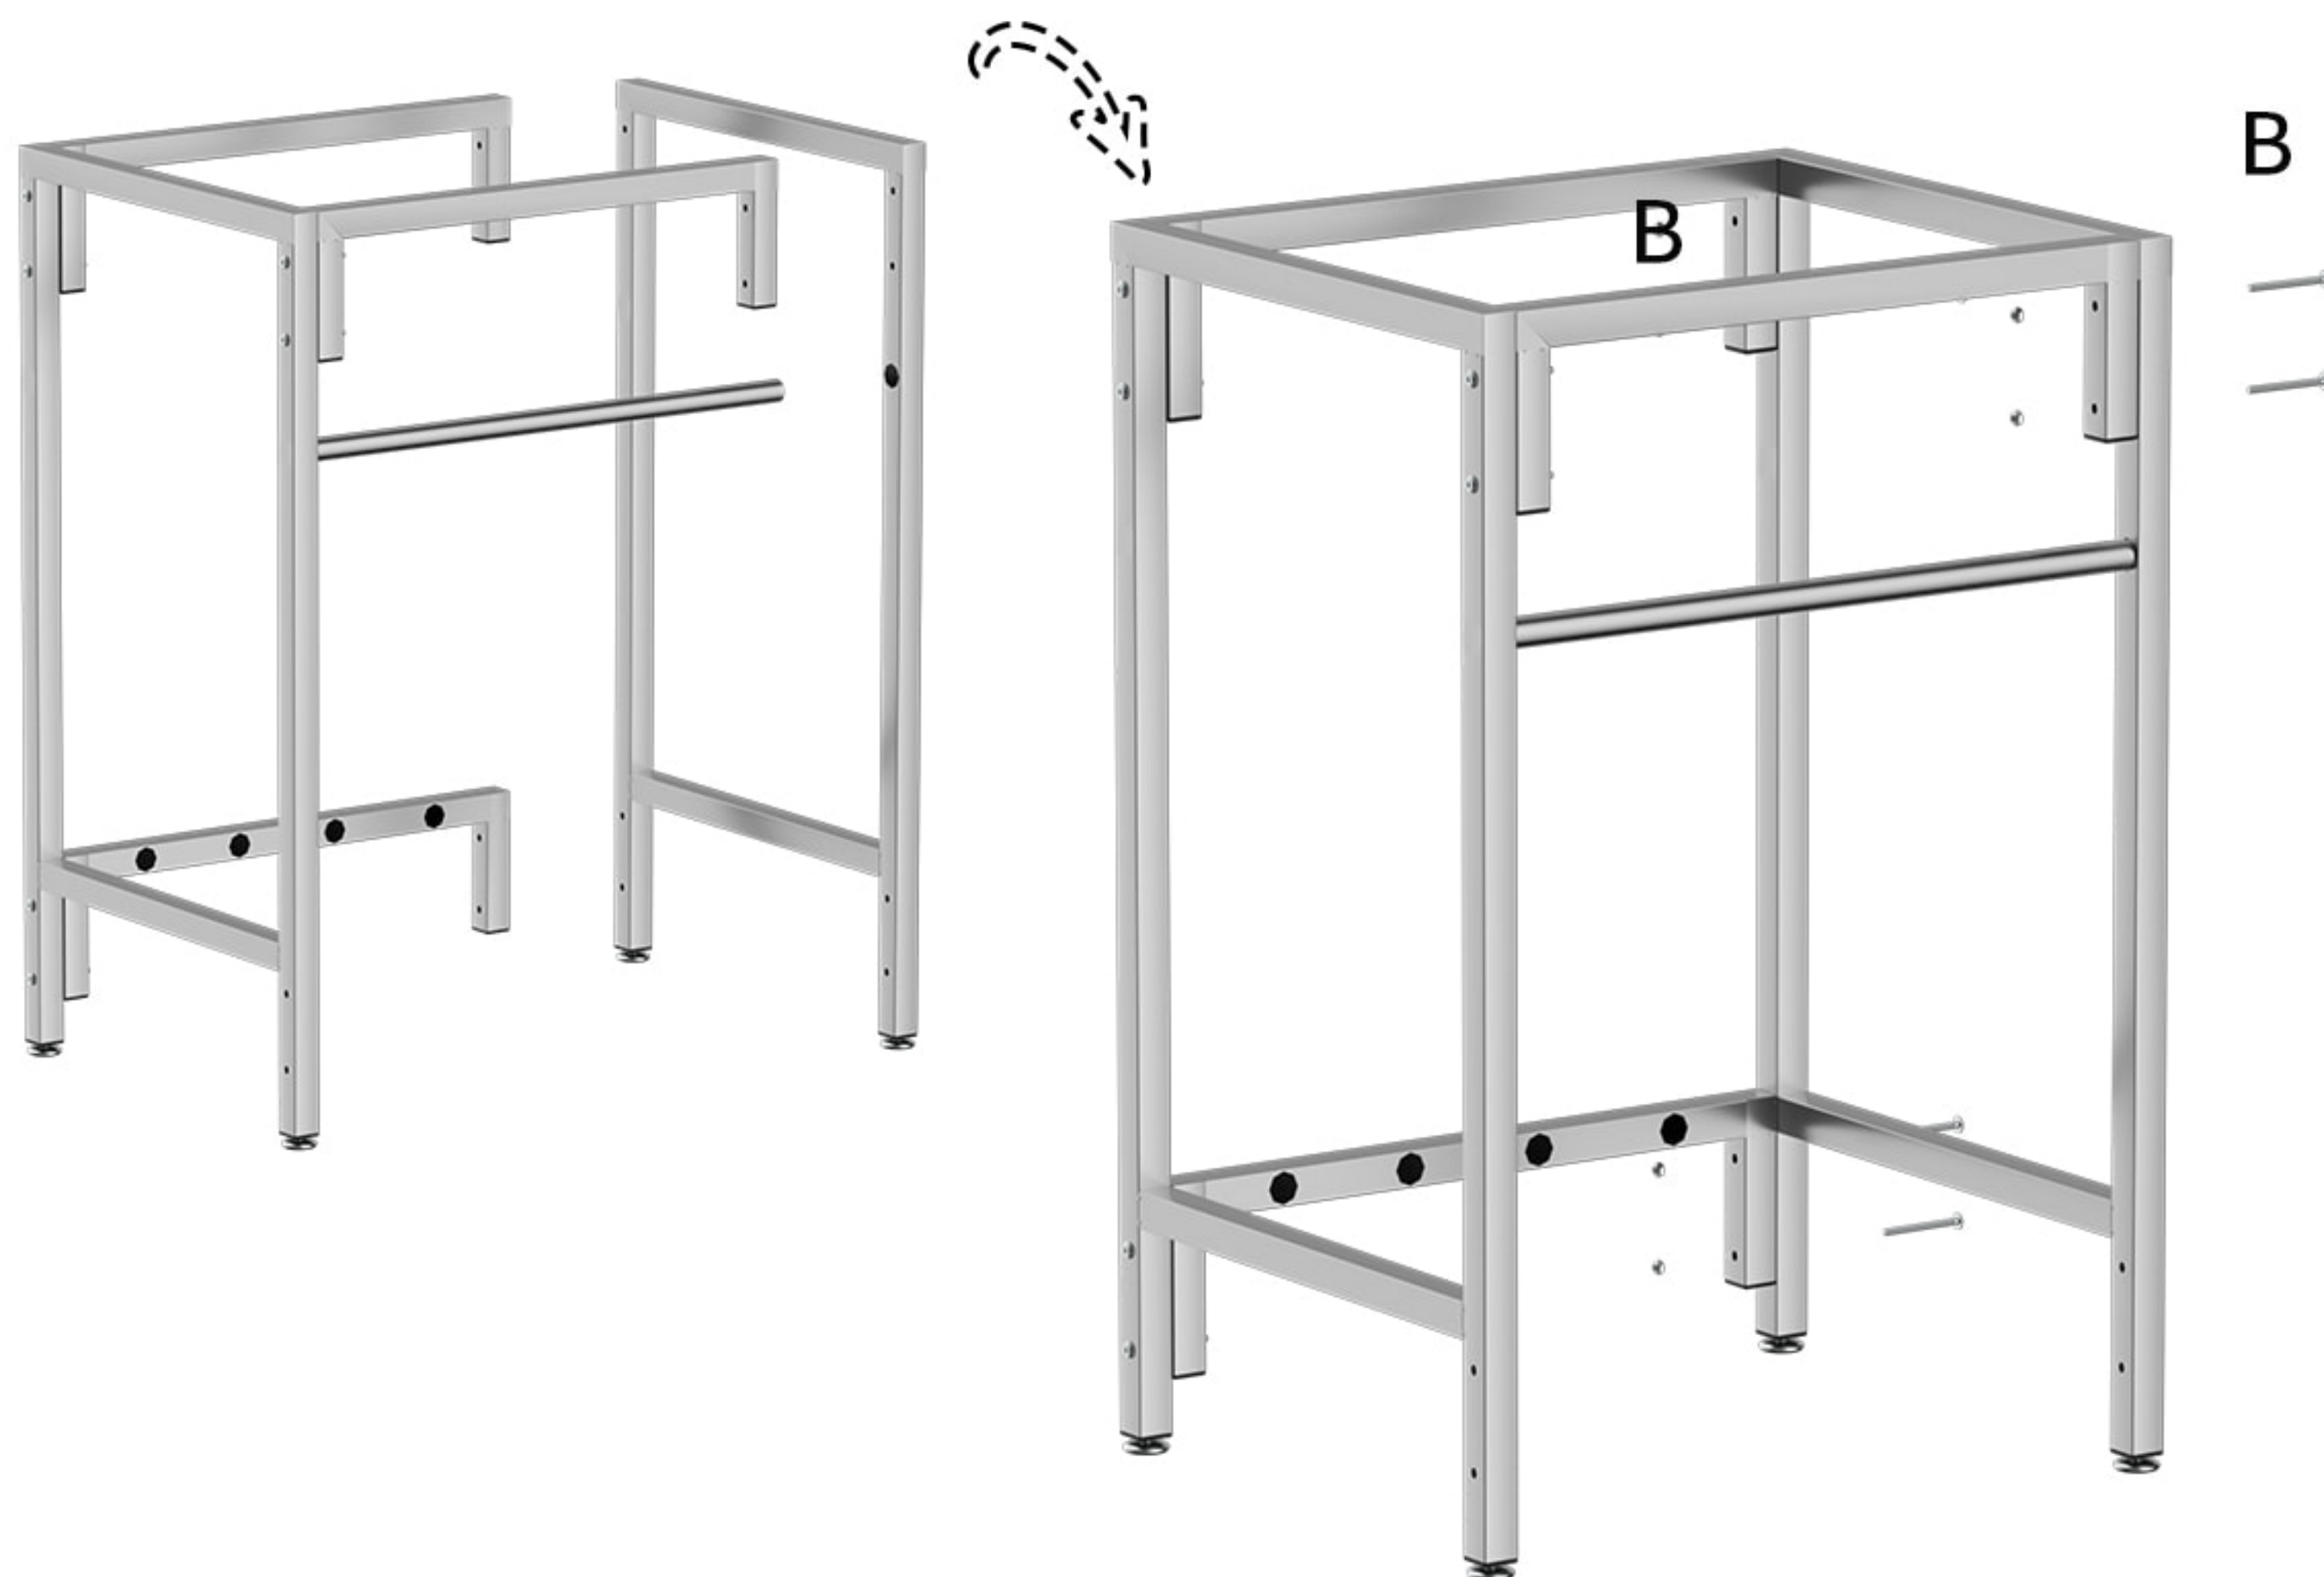

2. Connect and fix the front upper support tube and shelf support tube with one side support frame with screws and nuts.

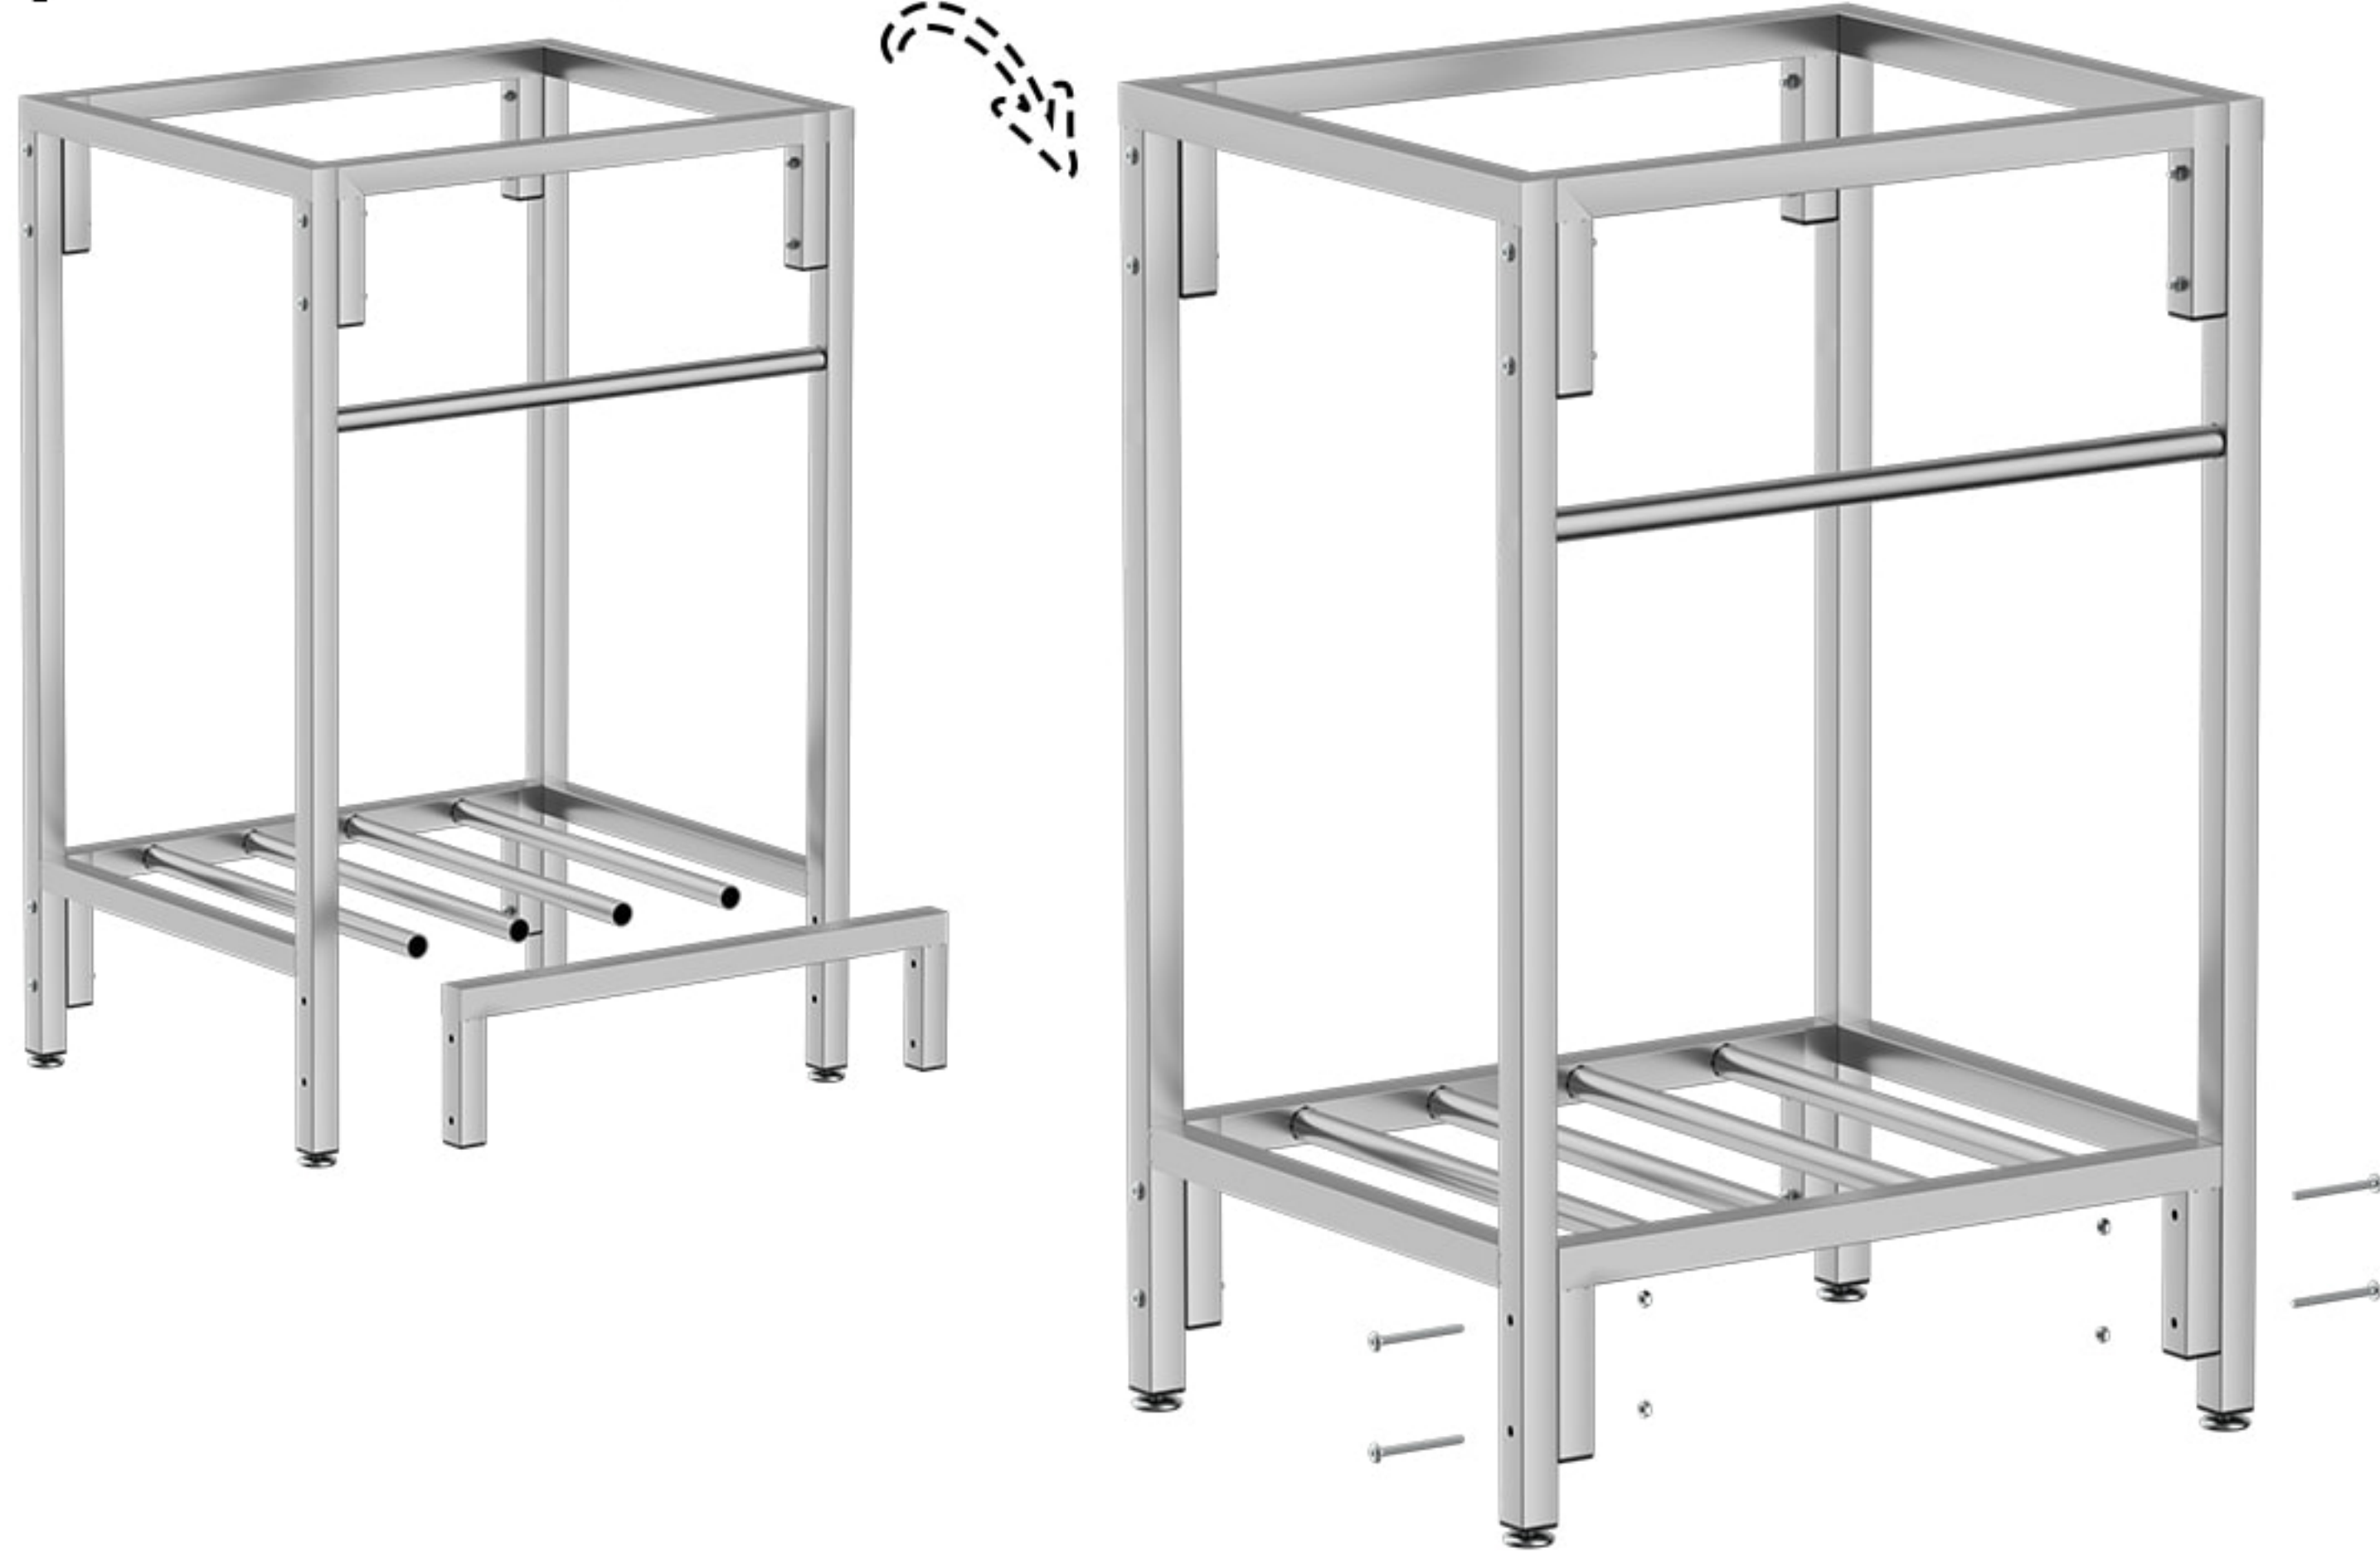

3. Insert the towel bar.

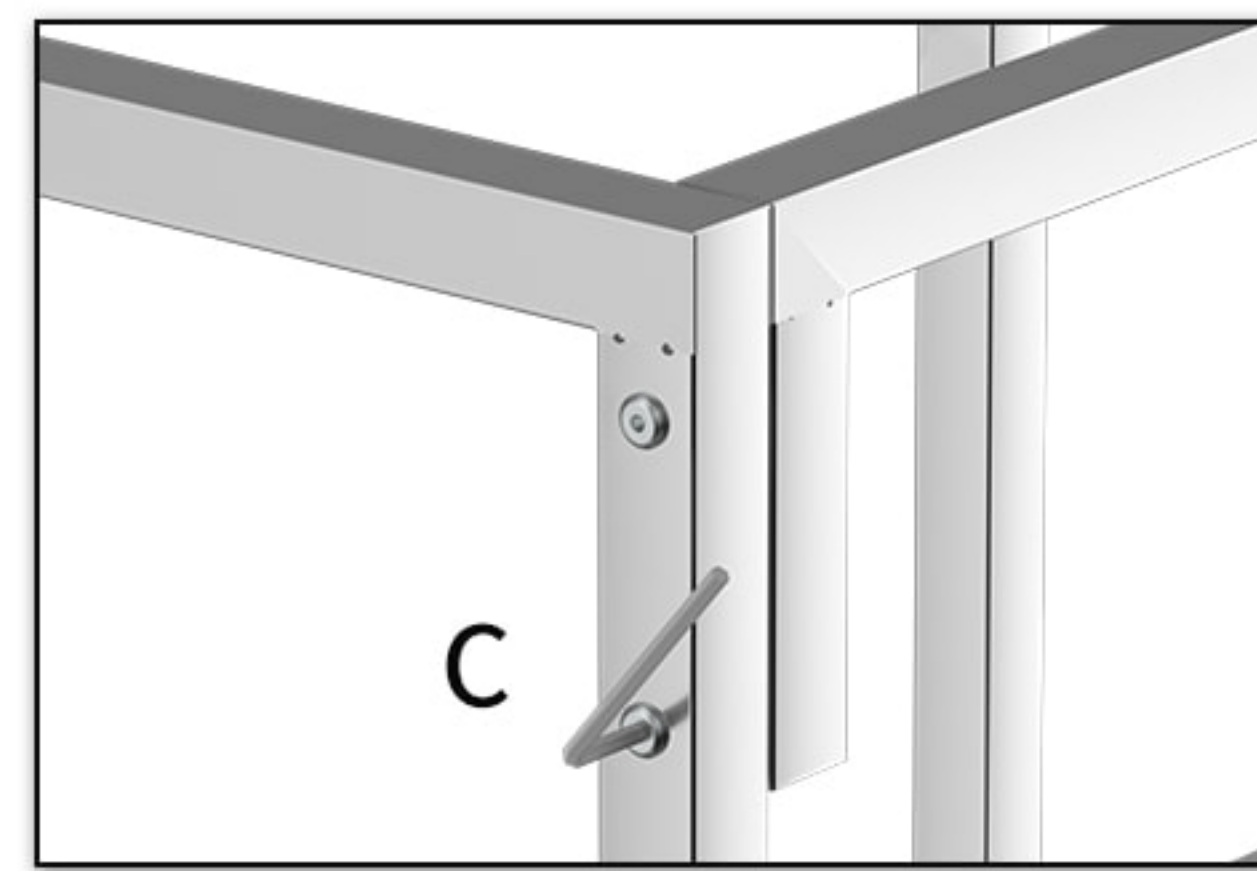

4. Attach one side support frame again.

5. After inserting 4 round tubes on each of the corresponding round holes of the bottom support tubes, install another tier shelf

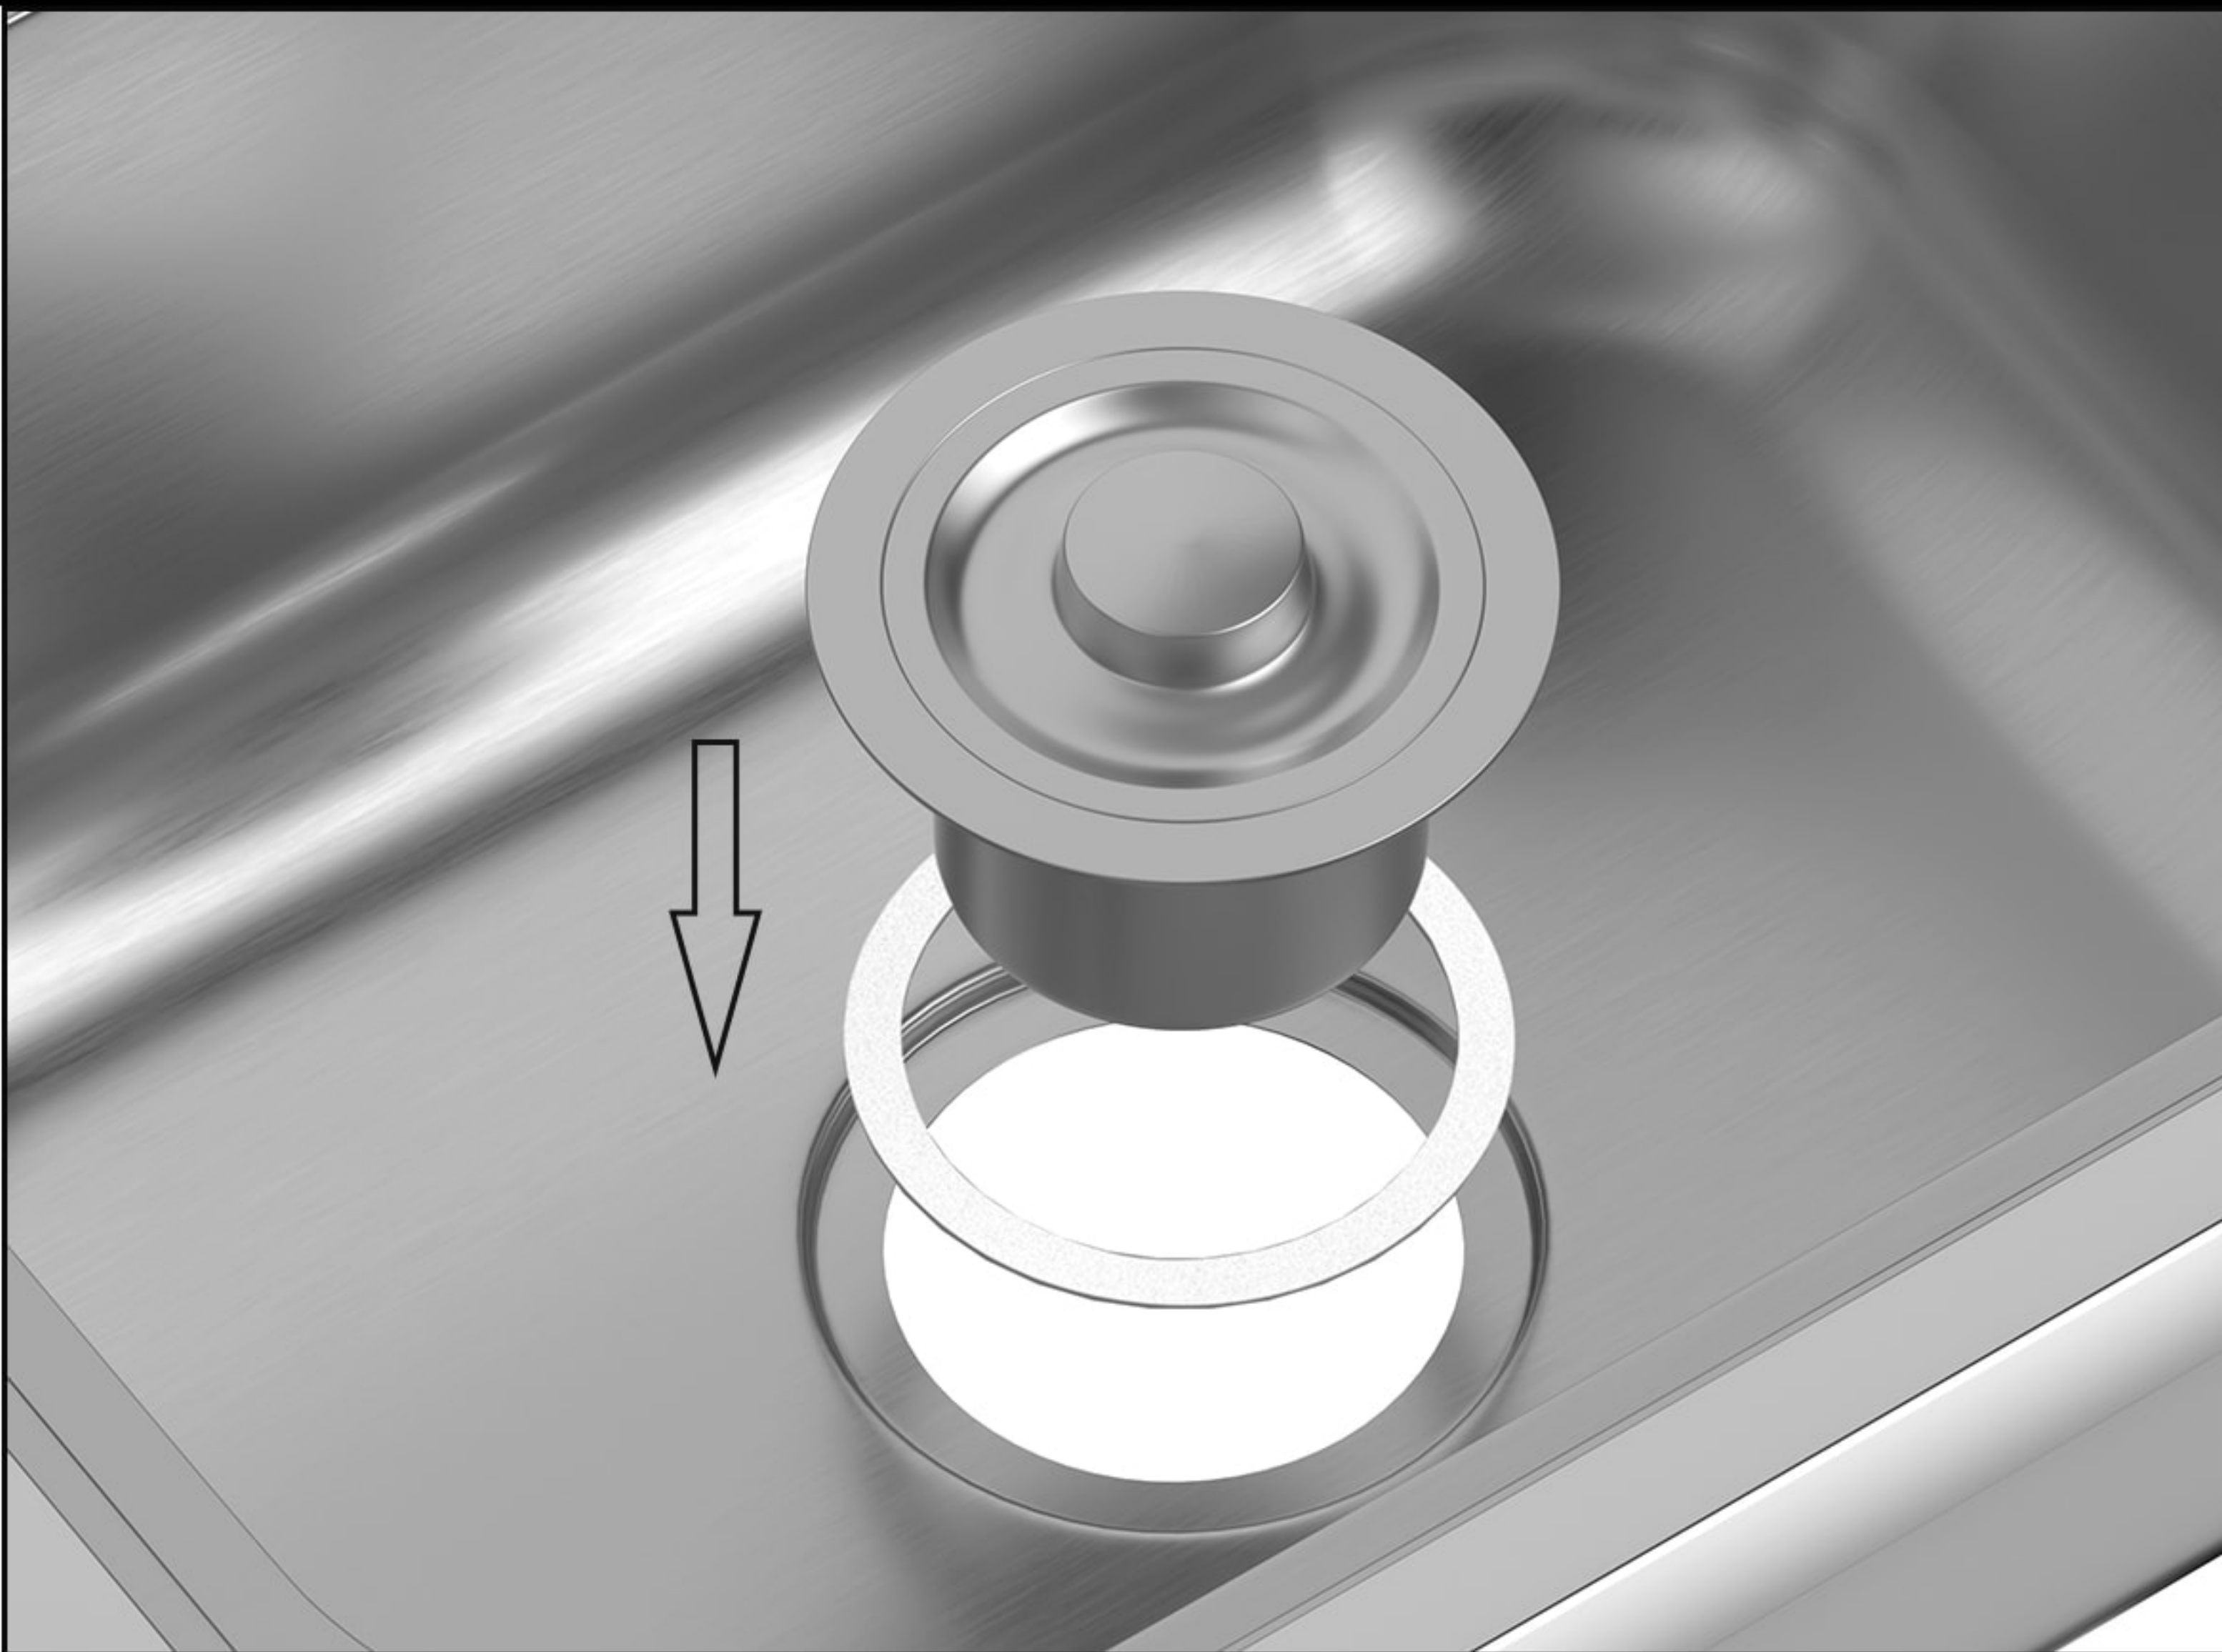

6. Tighten all screws on the bracket with a hexagonal wrench, and then place the sink into the bracket frame, and the bracket part of the installation is completed.

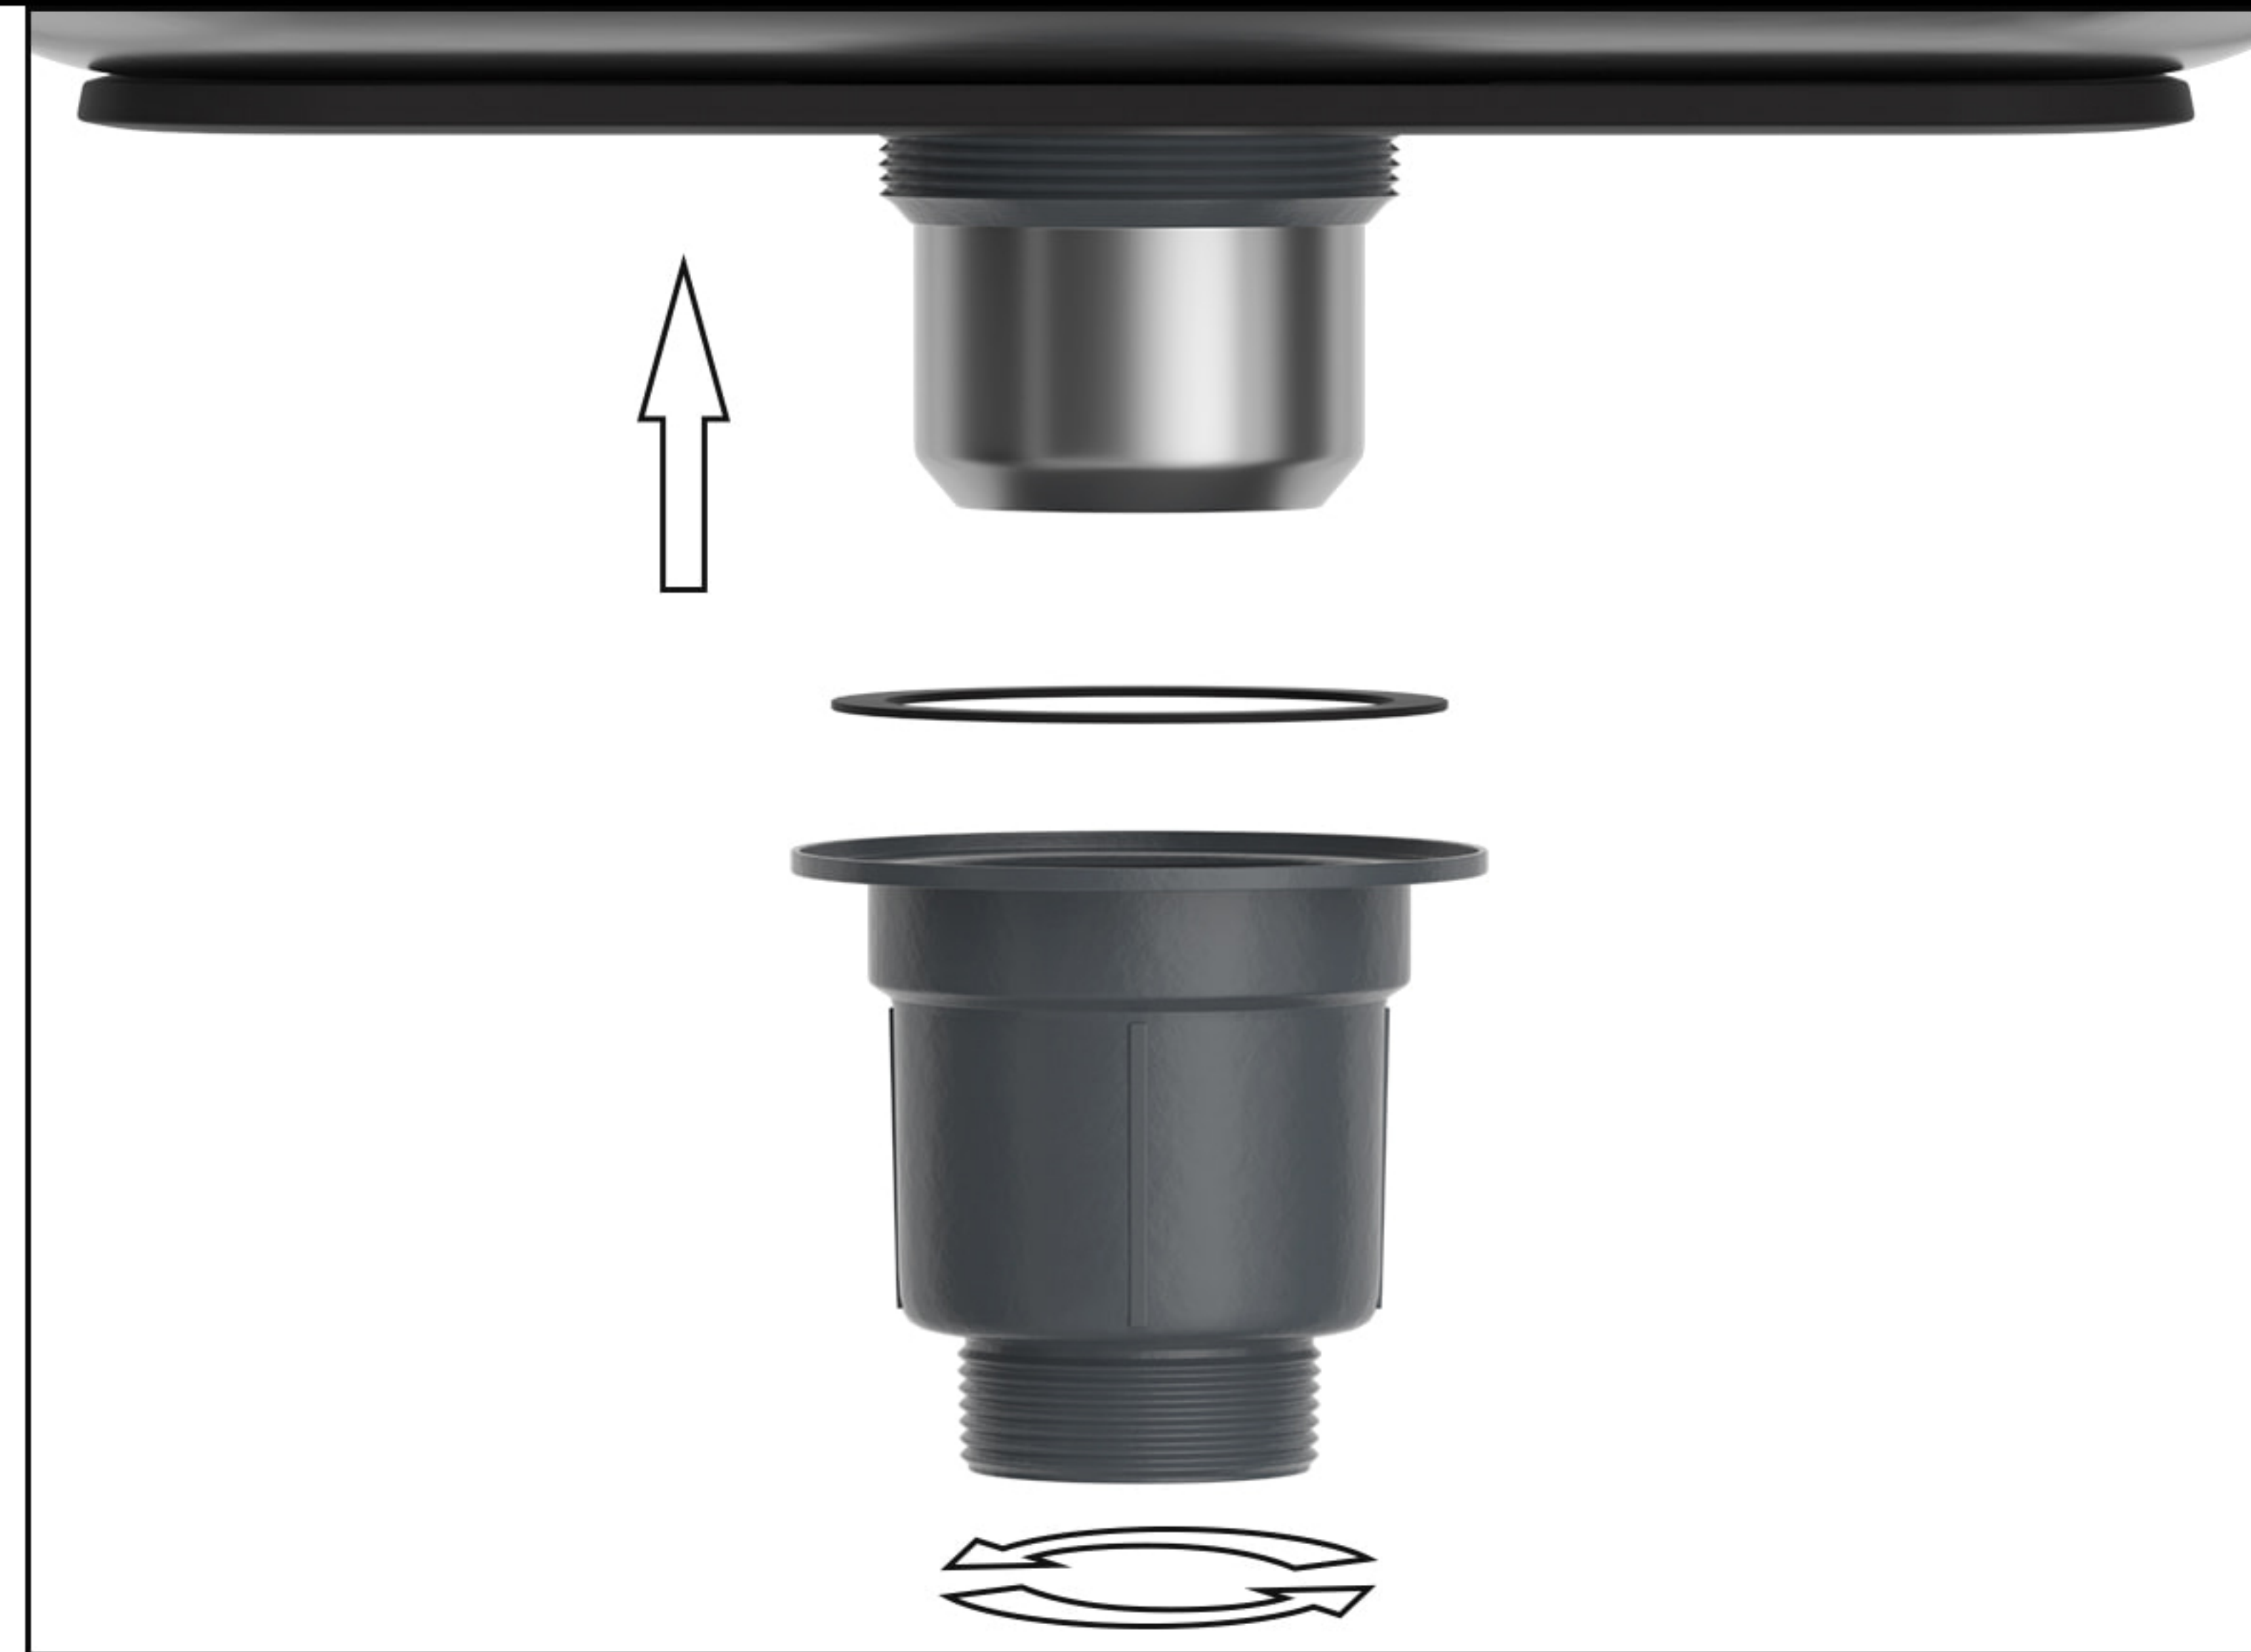

*Please note that the front support tube and the side support frame should be kept at the same level before tightening the screws.

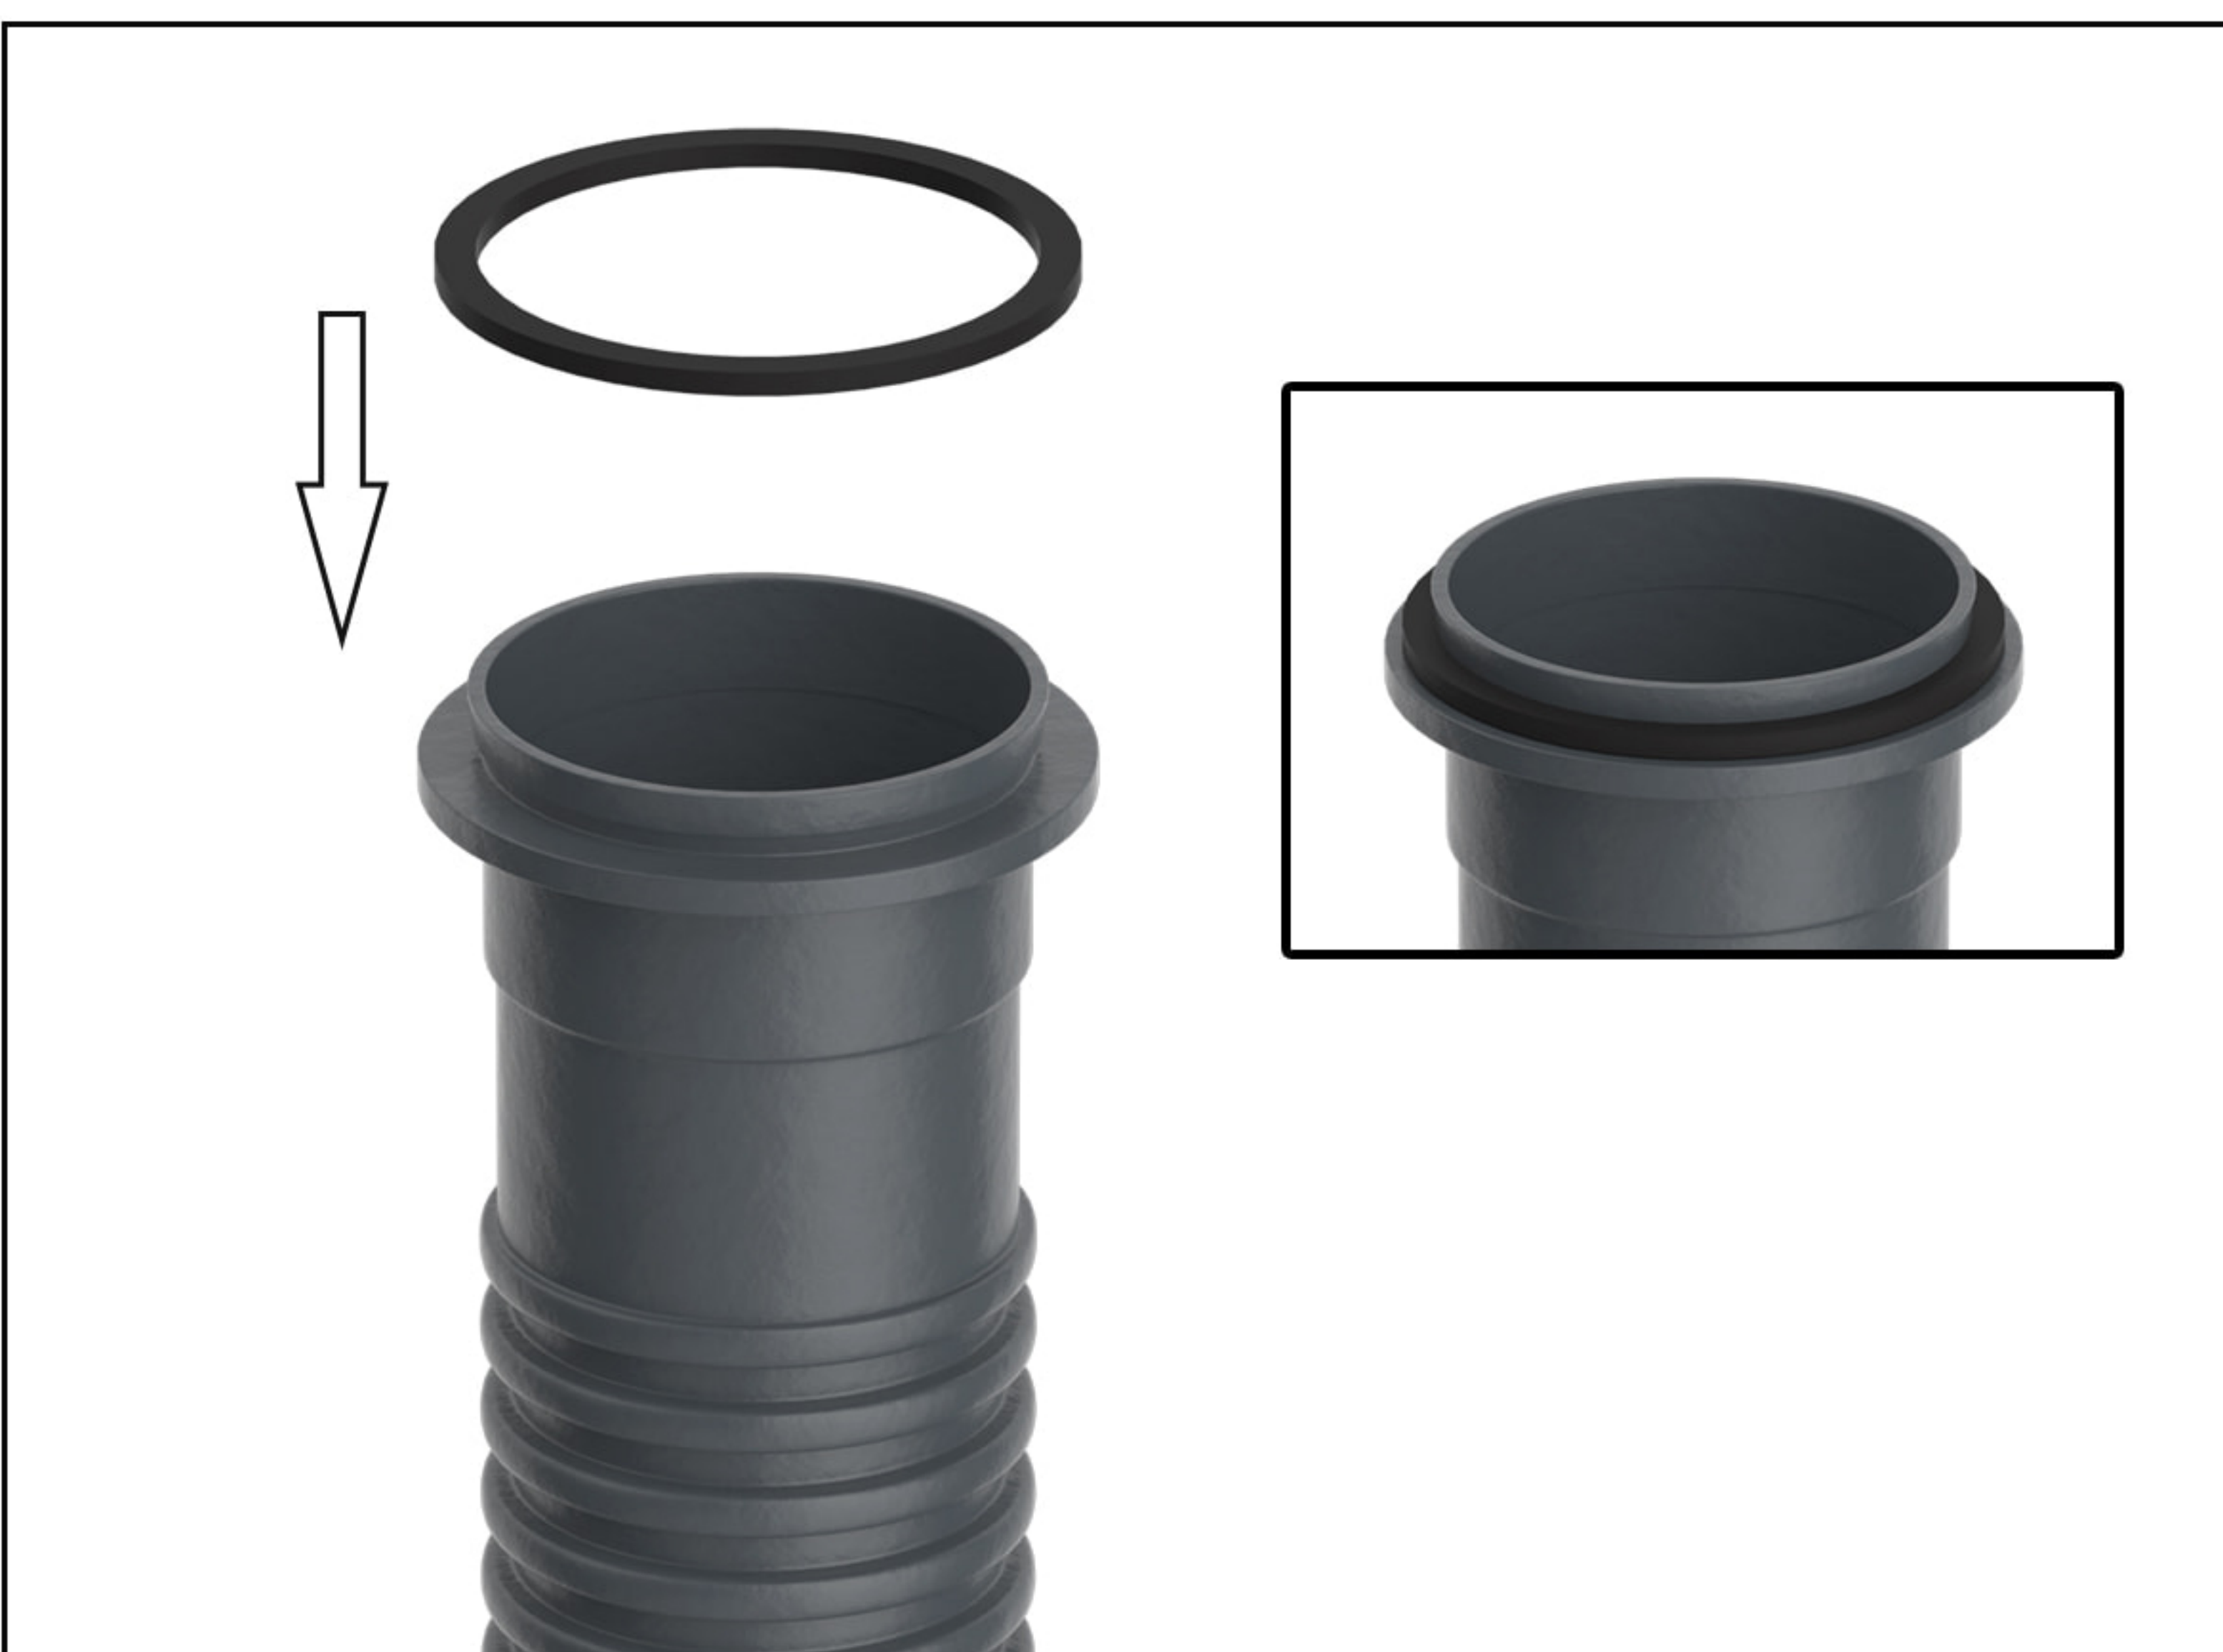

Instructions for installing the drainer

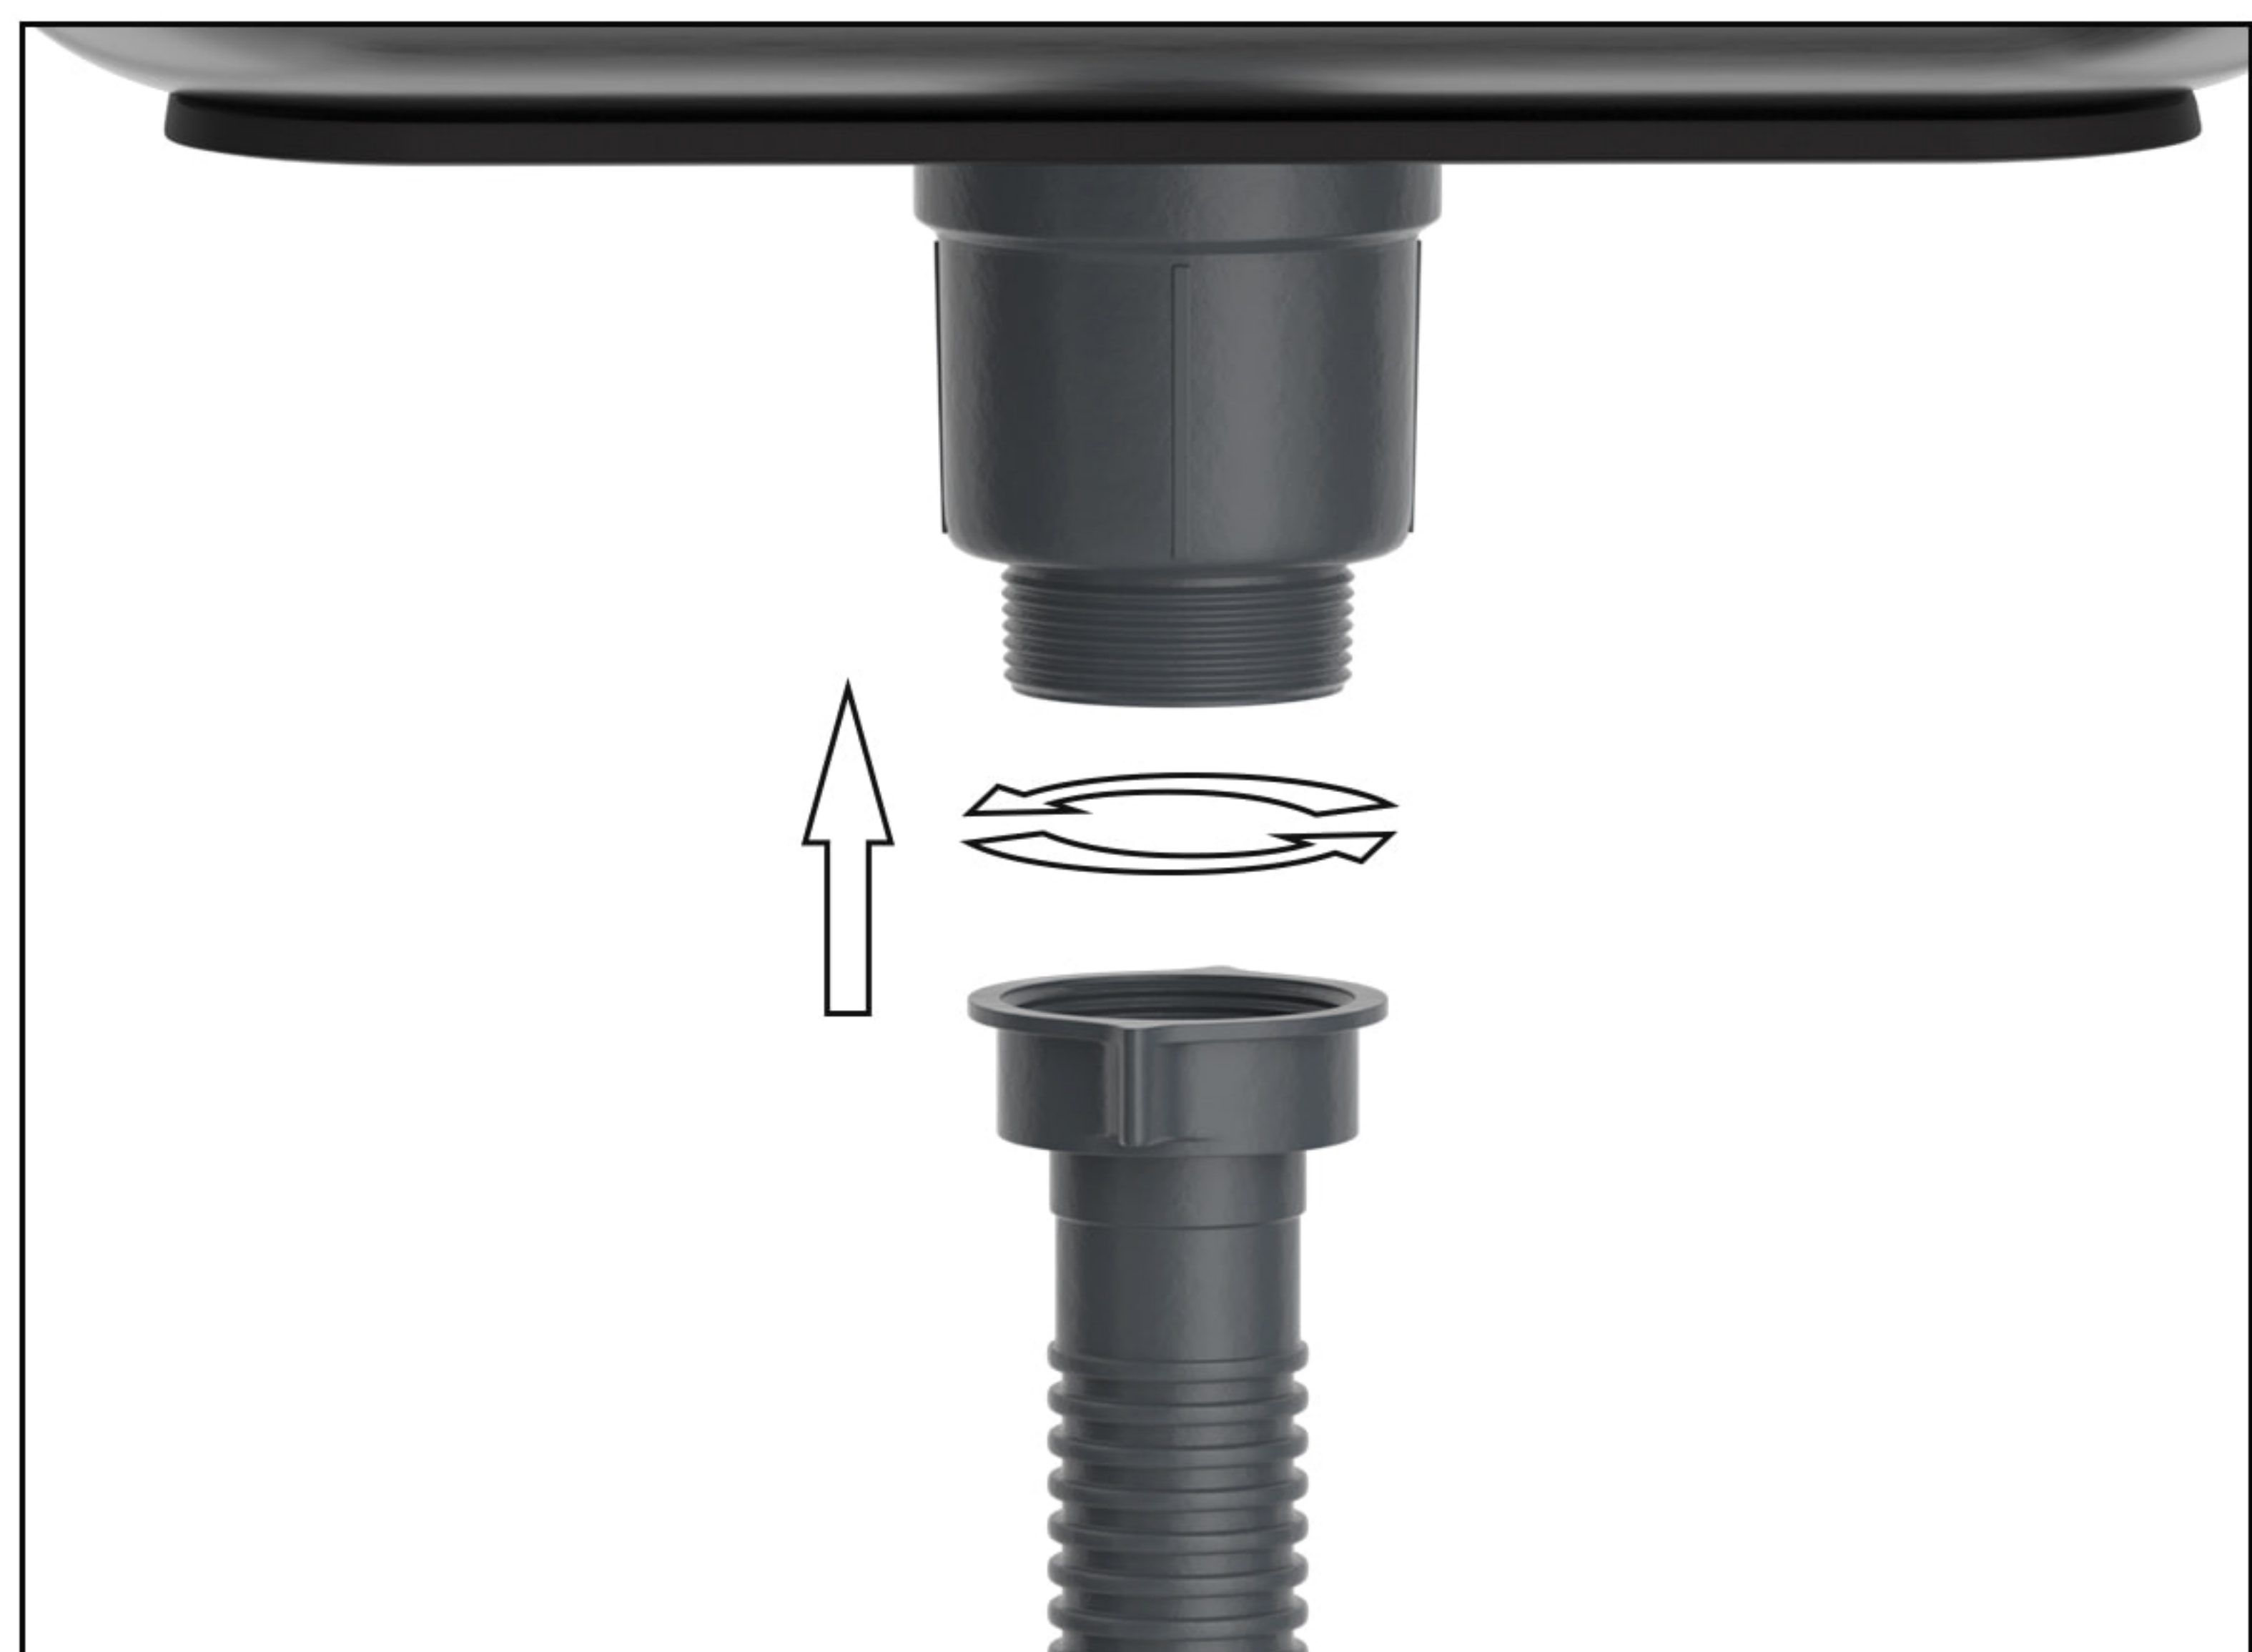

1. Place the white washer and drainer in the sink downspout.

2. Place the black washer under the sink, then tighten the cup.

3. Place small washer at drainer connection.

4. Unscrew the downpipe.
