Pre-assembly

1. Two or more people are required for assembly.

2. You will need one or more stepladders.

3. Wearing protective gloves is recommended.

4. You may need a safety hat.

5. Please use a Phillips screw driver.

6. For ease of construction, you may need a drill.

7. You may need a safety goggle.

8. Do not fully tighten screws prior to complete assembly.

Warning & Attention

-Try to assemble this product on the flat ground, otherwise it is difficult to carry out;

-It would be much easier to assemble the product with three or more people;

-After assembly, please check whether all screws are tightened, to prevent parts from falling apart.

▲ Use bolts to secure the frame to the ground to against the strong wind.

1

×12

If the deck is hard wood and the depth of it is over 3 inch, you can use **5/16 in. ×4 in. Structural Wood Screw** to mount the gazebo.

2

If the ground is concreted and the depth of it is over 3 inch, you can use 1/4 inch expansion bolts to mount the gazebo

3

Or you can make a concrete footing for gazebo, **15×15×15 inches** is recommended. use expansion bolts to mount the pergola like ② shows.

IMPORTANT:
Anchor is not recommended

(1) Insert Part #C2 into Part #C1 and secure with 3 Bolts #8.

(2) Insert the other side of Part #C2 into Part #C and secure with 3 Bolts #8.

(4) Insert Part #X into the beam and secure with 1 Bolt #8.

(3) Connect Part #C1 and Part #C through Part #C2.

(5) Secure the bottom of Part #X and Part #C/C1 with 3 Bolts #8.

(6) Repeat the above procedures to assemble the other Part #C and Part #C1.

10

Technical drawing of a cross-section of a multi-layered board. The drawing shows three main layers: a top layer labeled 'D', a middle layer labeled 'X', and a bottom layer labeled 'D2'. The middle layer 'X' is a dark grey rectangle. Below the middle layer, there are three vertical components labeled '8 3x', which appear to be screws or fasteners. The entire assembly is shown within a circular frame.

A diagram showing a cross-section of a composite beam. A large downward arrow indicates a vertical load. A circular inset provides a magnified view of a crack in the beam. The crack is labeled 'D' and 'D2'.

Technical drawing of a double-rod assembly (X2). The drawing shows two rods joined at a central point. A circular callout provides a magnified view of the joint area. Labels 'D' and 'D2' indicate dimensions. The text 'X2' is present in the upper right corner.

(6) Repeat the above procedures to assemble the other Part #D & #D2.

11

Diagram illustrating the assembly of a metal bracket (C2) to a wall using a screw (8) and a plate (D2). The bracket is shown being attached to a wall surface.

A detailed cross-sectional diagram of the connection between the two beams. A large downward-pointing arrow is positioned above the joint. The joint is shown within a circular frame. Two beams, labeled D1 and D2, are joined. Beam D1 is on the right and has a T-shaped cross-section. Beam D2 is on the left and has a rectangular cross-section. The beams are connected by a central vertical plate. Several screws are shown securing the connection. The diagram illustrates the structural integrity of the joint.

Technical drawing of a double-row roller chain (X2). The drawing shows a perspective view of the chain with three dimensions labeled: D (pitch), D1 (inner link width), and D2 (outer link width).

(6) Repeat the above procedures to assemble the other Part #D2/#D1.
