

**New Orleans**

Please see the measuring guide below. Note the measurements from bracket to bracket will be 1 inch larger than the top bar and fabric width. This awning can ONLY have a custom width.

<b>MEASURING GUIDE</b>		
Example in Diagram Above: NEW YORKER		
LABEL	LABEL DESCRIPTION	CONSIDERATIONS
A	Awning Width	Every awning is 4.5" wider than the window/door size it is representing. This is for mounting purposes. Example: a 3' New Yorker is actually 40.5" wide.
B	Awning Total Height	Height measurements include valance in the measurements for all awnings.
C	Awning Height: Valance Only	
D	Door Width	
E	Required Mounting Space	4" minimum mounting space required above window or in-swinging door
F	Awning Drop	0" minimum drop over out-swinging door (for awnings less than 3' projection). Except for entries with out-swinging doors, the drop is a personal preference. The greater the drop, the more energy savings, but less interior light.
G	Overhead Clearance	Overhead clearance is restricted by the roof line.
H	Obstruction Distance	Width can be restricted by the proximity of obstructions, such as windows, lights, sconces, etc.
