If ground wire from the fixture is not supplied, wrap the ground wire (if not fixed on the outlet box) from the outlet box around the green grounding screw and tighten it.

NEVER CONNECT GROUND WIRE TO BLACK OR WHITE POWER SUPPLY WIRES.

2.Take note of the color of the wire(s) on your fixture. Identify which group your fixture wire(s) falls into and connect the wires according to the directions below:

3.Take your fixture wire(s) from [Group A] and place evenly against the black wire from the outlet box. Do NOT twist wires together before using wire connectors.

4.Fit a wire connector over the wires and screw the connector clockwise until you feel firmness.

5.Try gently to pull the connector off the wires. If you can pull the connector off, carefully re-do steps 3 and 4 as above, and check again for a firm connection.
