

PEYTON BENCH/COCKTAIL TABLE

Intricate details draw the eye in on this arresting design that can work as a bench or cocktail table. It's hand-crafted in a cold-forged process, which is how the woven iron structure gets its signature flattened texture. Metalsmiths weld raw, galvanized iron wire and hammer each section they make, then finishing the entire form with a dark shade of graphite. It's simple design and rounded edges help accentuate the craftsmanship in its rich textures.
