(double-sided with grooves)

Door inner laminate*5
(smaller than door suction laminate)

Door suction*5

Door pull*5

Metal strips

Door gasket

Small screws

Medium screws

Large screws

Installation tool

Assembly Steps

Make sure the iron side of the door suction faces forward

1. Take out the door suction plate and install the door suction with small screws
 2. Then fix the installed door suction plate and side bracket with large screws

Leave the front screws unscrewed

Remember to snap the metal strip into the hole not the groove

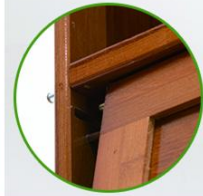

4. Take out and install the door suction layer and back panel indoor inner laminate and sequence
 5. Take out the top laminate and install them with large screws
 6. Take out the metal strips and insert them into the side brackets one by one

Door pull ring, door gasket installed with medium size screws

Metal clips inserted into both ends of the door

The metal clip snaps into the groove of the bracket

Since the screws in the fifth step are not tightened, the side bracket can be gently opened

7. Take out the door panel, door gasket, door pull ring, and metal clips and install them as shown in the figure

8. Open the right side bracket, and then snap the door panel into the bracket

9. Install the remaining door panels in sequence and tighten the screws
