- ◆ **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**  
◆ **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

### ASSEMBLING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker box. Remove old fixture and all hardware from Junction Box.
  2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
  3. Thread the two mounting screws about 1/4" into the pre-drilled holes in the mounting plate spaced the same distance apart as the holes in the lamp body's canopy (A).
  4. Attach the mounting plate to the Junction Box with the two Junction Box Screws as shown. The side of the mounting plate marked "GND" must face out. **The junction box is not included.**
  5. While holding the lamp body towards the ceiling, connect the electrical wires as Shown in **Fig.2**, making sure that all wire nuts are secured. You may have to wrap the connections with electrical tape. If your outlet has a ground wire (green or bare copper), connect the fixture ground wire to it. Otherwise connect fixture's ground wire directly to the mounting plate with the green screw provided. After wires are connected, tuck them carefully inside the Junction Box.
  6. Raise the lamp body(A) onto the junction box, aligning screws on mounting plate with mounting holes in lamp body's canopy and lock it securely with the column nuts(B).
  7. Raise the shade(C) and plastic shim(D) to the center pipe thread of lamp body, lock it securely with the column nut(E), place the diffuser(F) on to the bottom big round frame of shade(C).
  8. Install the light bulbs(not included) in accordance with the fixture specifications.
- NOTE: DO NOT EXCEED THE SPECIFIED WATTAGE!**

**Your installation is now complete. Return power to the junction box and test the fixture.**

FIG.1

The diagram illustrates the assembly components and their alignment. At the top, a 'Junction Box (Not included)' is shown. Below it is a 'Mounting Plate' which is secured by a 'Green Screw (GND)' and two 'Mounting screws'. A 'Junction Box (Screw)' is also indicated. The assembly is mounted onto a display panel (labeled 'C'). Below the panel, a vertical support structure is shown, including a base (labeled 'D') and a mounting bracket (labeled 'E'). A horizontal line (labeled 'F') represents the display panel's edge or a reference line.

FIG.2

FIG.2 illustrates three types of wire connections:

- Left Connection:** FIXTURE WIRES (Black or Smooth) connected to HOUSE WIRES (Black(Hot)).
- Middle Connection:** FIXTURE WIRES (White or Ribbed) connected to HOUSE WIRES (White (Neutral)).
- Right Connection:** FIXTURE WIRES (Bare Copper (Ground)) connected to HOUSE WIRES (Green or Bare Copper(Ground)).
