

STAINLESS STEEL BATHROOM CABINET USE AND INSTALLATION INSTRUCTIONS

1 、Daily use and maintenance

Proper use and maintenance can make your bathroom cabinet durable, please pay attention to the following:

1. Please keep the bathroom clean and ventilated, avoid prolonged exposure to the sun or water mist.
2. As detergents might contain abrasives and chemicals, avoid using detergents to clean the surface. Wipe with clean soft cloth. Please don't use steel wool
3. Avoid using sharp objects to scratch the surface.
4. Do not contact the surface with heat source above 60 degrees Celsius.
5. Water pipes must be connected tightly to ensure no leakage, and please make regular inspections of it.
6. Wipe the cabinet with dry soft clean cloth after your clean it with wet cloth or water.
7. In case the door hinges or drawer slide get a loose after long-time of use, please unfasten the screws, insert the same size wood nog with glue to the original hole, and fasten the screws.
