WE MAKE IT A HOME

GUIDE

Assembly:

The furniture is delivered flat-packed, disassembled, for self-assembly. Assembly should be carried out in accordance with the included assembly instructions. Appropriate tools must be used for assembly. In case of any doubts, please contact the seller.

Safety:

The furniture must be fixed to the wall to avoid the risk of tipping or parts falling off. Use screws appropriate for the wall type. If unsure, consult a specialist. Before fixing the furniture, make sure it is level.

Movable parts of the furniture (such as doors or drawers) should not be left open unnecessarily, as this may cause damage or pose a safety risk to the user. When placing the furniture near light sources or other electrical devices, exercise particular caution.

Especially, do not allow contact between such devices and damp surfaces, and avoid touching them before they are unplugged. Electrical connections should be protected from children and comply with applicable safety standards.

Furniture joint connections should be checked periodically. Any loose parts must be promptly tightened using the correct connectors and screws. Glass elements must be used with particular care and should never be overloaded.

Usage Guidelines:

The furniture should be used indoors, in dry, enclosed spaces, protected from harmful atmospheric conditions and direct sunlight.

Do not overload the furniture, as this may lead to permanent damage. Do not place hot cookware or containers on usable surfaces, and avoid contact with solvents or alcohol.

Do not allow excessive amounts of liquid to spill onto the furniture. In such cases, remove the liquid immediately and wipe the surface dry with a soft cloth.

Furniture should be cleaned regularly, vacuumed gently multiple times a week, and wiped with a soft, clean, slightly damp cloth, then dried.

YOU HAVE A HOUSE
WE MAKE IT A HOME

For heavier stains, mild cleaning agents intended for furniture may be used.

The furniture is intended for standard household use. Note: it is not resistant to scratching by sharp objects such as pet claws or items commonly stored in wardrobes.

Colour Scheme:

The colour of the furniture shown in photos may slightly differ from its actual appearance.

This is mainly due to differences in lighting conditions and individual monitor/screen settings.

Furniture features (e.g. colour intensity or finish) may also change slightly over time with use.
