SAFETY RULES

1. To reduce the risk of electric shock, turn off the electricity to the fan at the main fuse box or circuit panel before beginning.
2. All wiring must be in accordance with the local electrical codes or National Electrical Code. Electrical installation should be performed by a qualified licensed electrician.
3. To avoid personal injury, the use of gloves may be necessary while handling fan parts with sharp edges.
4. **WARNING:** To reduce the risk of fire, electric shock, or personal injury, mount fan only to an outlet box marked acceptable for fan support and use mounting screws provided with the outlet box. Most outlet boxes commonly used for the support of lighting fixtures are not acceptable for fan support and may need to be replaced. Consult a qualified electrician if in doubt.
5. The outlet box and ceiling support structure must be securely mounted and capable of supporting at least 10 KGS.
6. To avoid personal injury or damage to the fan and other items, be cautious when working around or cleaning the fan.
7. Do not use water or detergents when cleaning the fan or fan blades. A dry dust cloth or lightly dampened cloth will be suitable for most cleaning.
8. After making electrical connections, spliced conductors should be turned upward and pushed carefully up into the outlet box. The wires should be spread apart with the grounded conductor and the equipment- grounding conductor on one side of the outlet box.
9. Electrical diagrams are for reference only.
10. The fan is more suitable for indoor.

Installation Preparation

Tools Required

- Ladder
- Pliers
- Wire Strippers
- Screwdrivers
- Power Drill (Optional)
- Drill Bit (Optional)

Figure 1

What to Expect with Your Installation Conditions

- Be able to secure the fan to ceiling support structure and electric box

- Easy installation can be performed by one person

- Available for slanted ceiling angle less than 90°

Figure 2

Mounting Options

- Installation for Horizontal Ceiling

- Installation for Slanted Ceiling

Figure 3

Wiring Diagram

Connected to AC110V/60Hz

Figure 4

1. After cutting off the power, drive in the expansion bolts.
2. Secure the safety lanyard to the mounting bracket, then anchor the bracket to the ceiling using self-tapping screws.
3. Wiring:① Connect the black live wire marked "L" on the receiver to the live wire (typically black) on the outlet box.② Connect the white neutral wire marked "N" on the receiver to the neutral wire (typically white) on the outlet box. ③ Connect the ground wire (bare wire) from the base of the ceiling.
4. Mount the ceiling fan light onto the bracket, secure it by aligning with the mounting holes, and tighten all screws. Confirm the installation is rigid and stable.
5. Operate the luminaire only after verifying all connections are secure

Name	QTY	Name	QTY
A: Expansion rubber plug	3	E: Self-tapping Screw	3
B: Ceiling Mounting Bracket	1	F: Wiring cap	3
C: Hanging plate screw	4	G: Fan lamp	1
D: Safety rope	1		

Intelligent Remote Control
