How to recline?

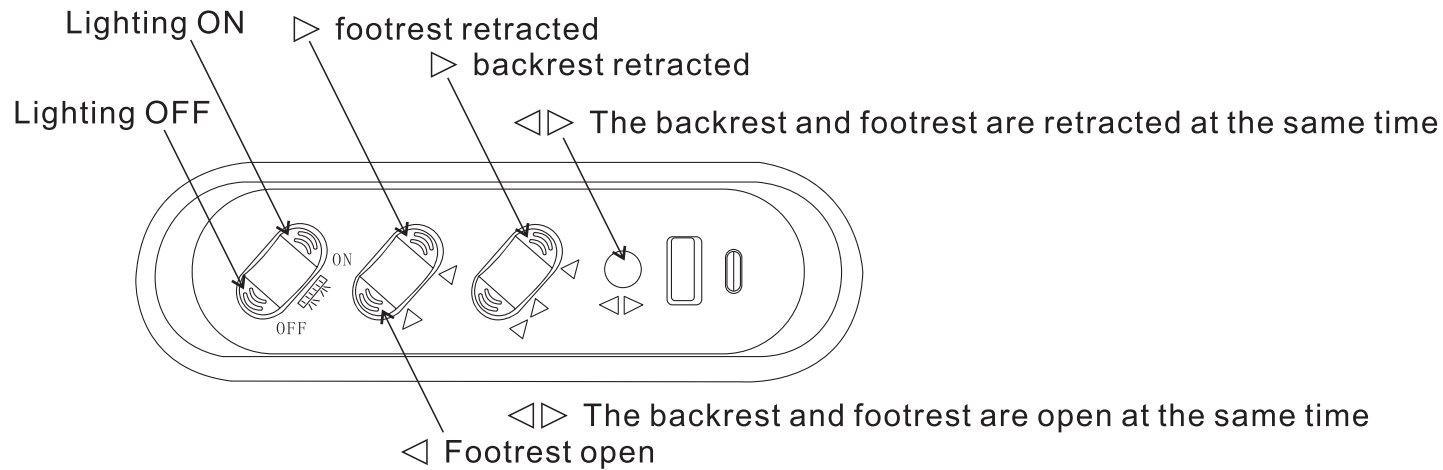

Warning:
1. The USB charging port is only intended for charging low-power electronic devices such as smartphone and iPad.
2. It is normal for the control panel surface to become slightly warm during charging.
3. The charging method is slow charging. When the load is high, the USB charging port will activate the power-off protection function. Once the load returns to normal, the charging function will automatically resume.

FAQ

1.Q:Missing parts

A: Please check if you have already received two boxes. If so, kindly send messages to let us know the letter name of the missing part according to this instruction, we will send replacement for you asap.

2.Q: Some parts damaged when arrived

A: Please send damaged parts photos to us as message attachment, we will check and offer good solution soon.

3.Q: The lift and reclining function does not work

A: Please check if all wires connect correctly, the power source is defective if remote control does not light on, or else, chair base is defective, kindly send messages to describe the problem then we will send replacement chair base for you.

4. Q: The chair is stuck on lifting or reclining position, and there is no response when you press the lifting or reclining button.

A: Please kindly check if the power source (F) and control panel are connected well. Sometimes the power source (F) may fall off from the wire at armrest. if they connected well, then check the left motor having some anomaly, like some noise comes out when you press the lift and recline button. if you can make sure the motor is defective, please contact us for replace motor or base of chair.

5.Q: The vibration massage functions is not working.

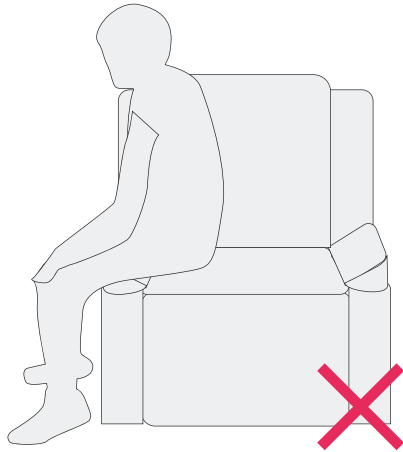

A: Please check first if all wires at the back of recliner chair are connected correctly. The power cord also been plug into the wall outlet. Then please check the lights on when you press "POWER" button on the remote. If no, the remote is defective and you can contact us for new one to replace.

6.Q:The Heat function not work or can't feel.

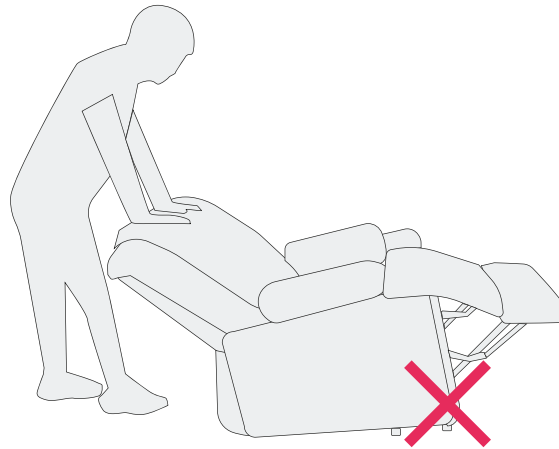

A: Please check all wires connection as same as question 5 first. If the remote also works well, you will need wait for 5-10 mins after you press the "HEAT" button. The heating is only works at lumbar position and the heat temperature isn't very hot.

Warning

Do not sit on or press armrest

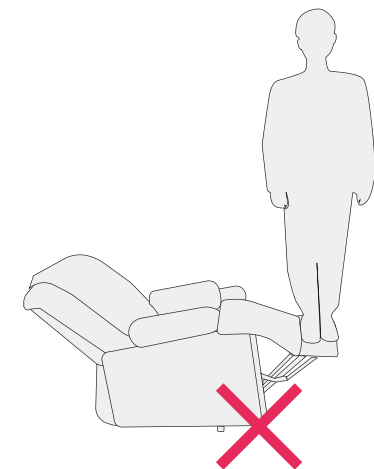

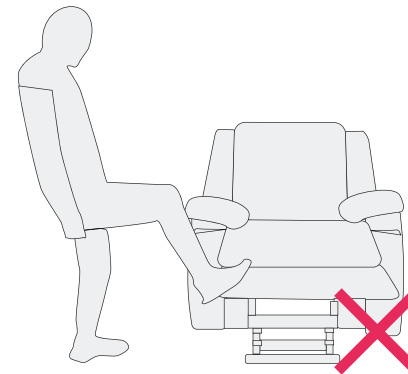

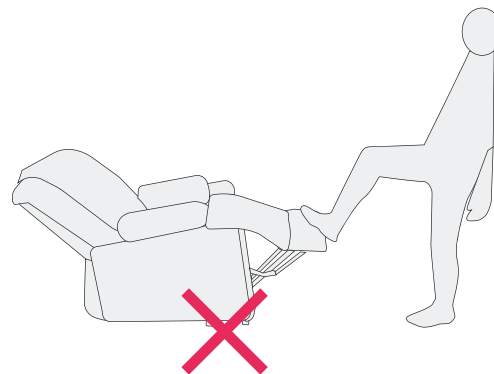

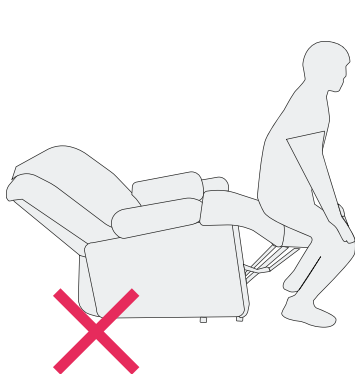

Do not press backrest after recline

Do not get off the chair after recline

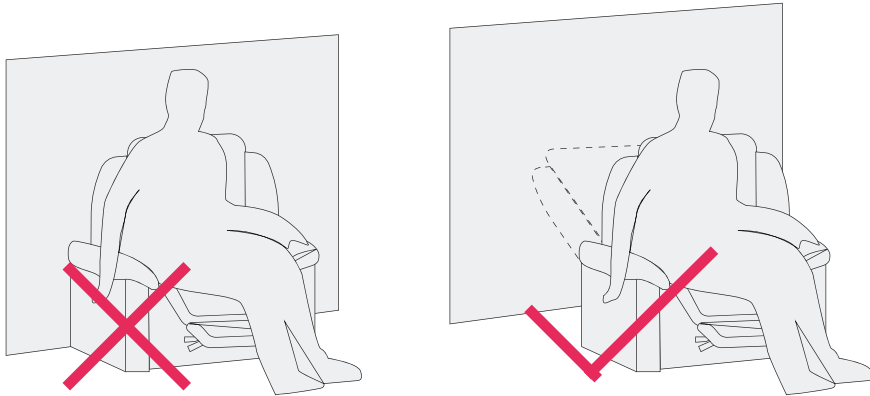

Do not sit/kick/stand on the footrest after lift up

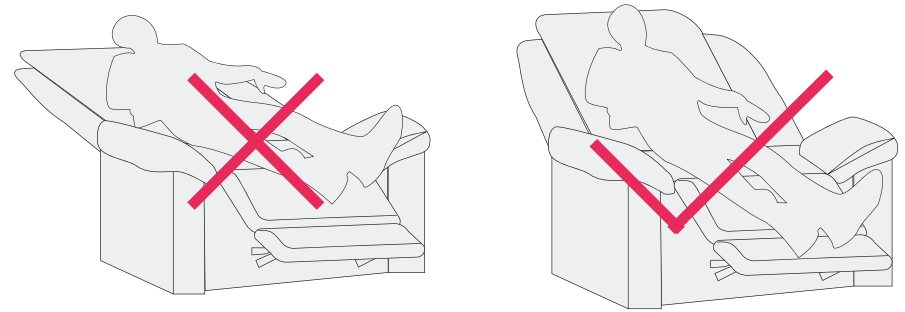

Warning

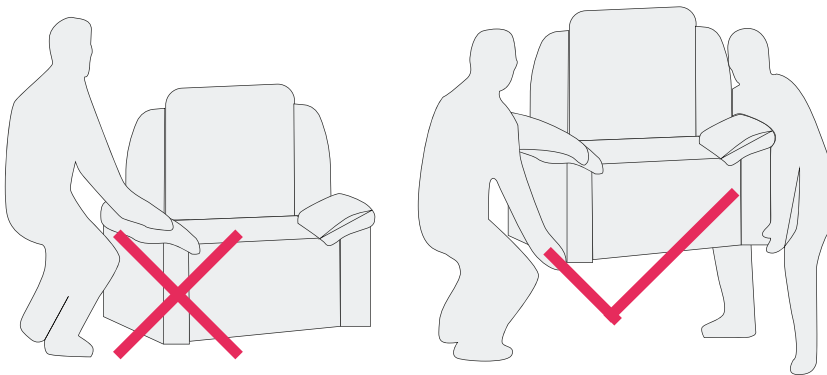

Leave enough space between chair back and wall before recline

Don't lean too far back in case of topple over

2-Person lift

Do not move chair when it's reclining
