

Equinox Wall Lamp

Assembly Instructions for the Brightech Equinox Wall Lamp:

Step 1- Line up Upper Pole (A) and Bottom Pole (B) on a flat surface

Step 2- Use Connector Clamp (C) (two pieces) to anchor poles together, making sure poles are straight and wire is not pinched. You will need to insert the bar extending from one clamp side through the two wires which

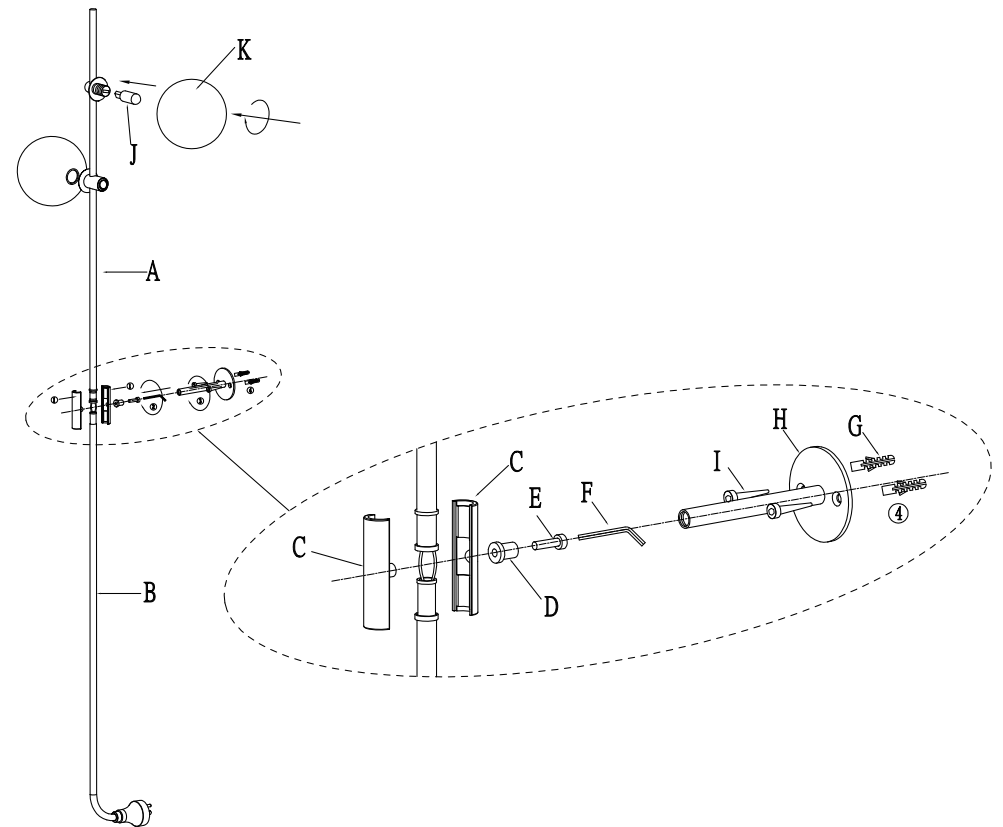

Step 3 - Fit Wide Screw (D) onto Long Bolt (E) then screw both in place on connector clamp, using provided Allen Key (F).

Step 4 -Screw Wall Mount (H) onto the end of bolt.

Step 5- If needed, use Wall Anchor (G), two pieces, for installation on hollow walls. Line them up with the holes on Wall Mount (H), and mark their place on the wall before installing, to ensure installation is aligned. (NOTE - make sure that the desired installation point is in line with an outlet. We suggest using a leveler for best results.)

Step 6 -Mount assemble lamp at Wall Mount point in place using provided Screws (J) and make sure to plug lamp into outlet before tightening.

Step 7 -(NOTE - please make sure that the lamp is off before completing this step) Slide LED lights (J) into sockets on pole, then screw Globes (K) on in

Operation and Features:

The lights on the Equinox Wall Lamp are controlled via individual switches located at each head height. This lamp can be turned on and off via a wall switch for convenience, just leave the lights turned on and operate from the wall switch. Please NOTE, lamp is not dimmable at this time.

Thank you!

Thank you for purchasing this product!
