

# HG-HJ-1244

## Specifications:

Dimension : 45x40x44cm/17.72x15.75x17.32in;

Net Weight : 9.5kg;

Rated Voltage : 110V;

Control : Microcomputer;

Rated Frequency : 50Hz;

Desktop Dishwasher Rated Power : 1200W;

Water Consumption : 8L;

Rack Material: Stainless Steel.

## Notes:

1. When the dishwasher is running, do not open the door of the dishwasher, because steam and hot water will splash out;
2. In order to prevent sharp utensils from scratching the inside of the dishwasher, relatively sharp utensils(for example Knives) must be installed in the chopstick basket provided with the dishwasher, and the sharp end facing down or placed horizontally;
3. The maximum allowable water inlet pressure of this machine is 1 mph; the minimum is 0.04 mph. The inlet water source must not use hot water above 50°C;
4. If you need to improve the effect of dishwashing, you must use dishwasher-specific detergents;
5. It is normal that there is residual water under the filter after washing.
6. The dishwasher must be used with cold water. If the hot water is connected, the swivel arm will not rotate and the water will not drain, even damaging the water inlet motor.
7. This dishwasher has no designated place to put detergent or soap, just need to sprinkle detergent on the plate.
8. If your faucet is of the type without a convex outlet, it will not be able to connect to our water inlet pipe.
9. **Note: The inner diameter of the thread of the hose is 1/2", and the customer needs to purchase an adapter with an outer diameter of 1/2".**

## Package Includes:

1 x Tabletop Dishwasher

1 x Water Pipe

1 x User Manual
