

FOR CALIFORNIA RESIDENTS

We at Ruvati care about our customers and want to keep you informed. You may find a label on some of our products like the warning label below. This warning is required by the California Proposition 65 (Prop 65), which is meant to notify California residents of exposure to Prop 65 chemicals.

What is this warning?

California's Proposition 65 (Safe Drinking Water and Toxic Enforcement Act of 1986) entitles California consumers to special warnings for products that contain chemicals known to the state of California to cause cancer and birth defects or other reproductive harm if those products expose consumers to such chemicals above certain threshold levels.

Proposition 65 does not ban the sale of products containing these chemicals, but instead requires warnings on any product, product packaging, or literature with the product. Please note that a Proposition 65 warning does not mean a product is in violation of any product safety standards or requirements. In fact, the California government has clarified that a Proposition 65 warning "is not the same as a regulatory decision that a product is 'safe' or 'unsafe.'" Many of these chemicals have been used in everyday products for years without documented harm.

All our faucets are tested and certified by IAPMO to meet federal lead-free standards and industry regulations including NSF 61 and 372.
