

TIPS:

- 1, In order to facilitate the assembly, the screw holes related to the product structure have an adjustable range.
- 2, When assembling, please align the screws on the armrest and the beam and install them to 50% first.
- 3, After all the screws are installed, then tighten them all to 100%.
(The screws connecting the seat and the backrest can be directly screwed to 100%)

You can also watch the installation video on the product page.
If you have any questions, please contact us on amazon, we will give a solution within 24 hours
