

# INSTRUCTION MANUAL

## PARTS LIST

## INSTALLATION DIAGRAM

## THE INSTALLATION STEPS

**01** Turn the screws ⑤ on the side of the cross bracket ① counterclockwise to remove them, then take out the cross bracket ①.

**02** Use the cross bracket ① to find a suitable position on the ceiling, use the drill to drill the four holes on the cross bracket ① in the corresponding ceiling, and stuffed into the adhesive particles ②, and then use the self-tapping screws ⑧ through the screw washer ⑦ to cross the bracket ① fixed to the ceiling.

**03** Connect the power cable using accessory ⑥. The yellow wire is the ground wire and should be connected to the reserved ground wire. If there is no reserved ground wire, it can be left unconnected.

**04** Cover the cross bracket ① with the canopy ③ of the ceiling light, aligning its holes with the four holes on the side of the cross bracket ①. Then, tighten the screws ⑤. After securing everything, turn on the power to test the light. The installation is now complete. (Refer to the operation shown in the right-hand diagram.)

Note: If the wall is not reserved with the ground wire, The lamp does not need ground wire ④.
