

PORTABLE COMFORT FURNACE

Comfort Glow™

The safe, clean and comfortable way to help reduce whole home heating costs.

HOW IT WORKS...

- High-velocity fan draws cool air through the washable air filter
- Cool air is passed through resistance type preheater
- Warmed air is forced around quartz heating element(s)
- Hot air passes over the copper deflector and into the room

Reduce Total Home Heating Costs

According to the Energy Information Administration the average homeowner can save 3% for each degree the central heating system is set back. With the efficient Comfort Glow Portable Comfort Furnace you can turn back that money paying central heating system and still stay warm in the rooms used most often.

DELUXE DESIGN

- Utilizes quartz and resistance heater technology
- High-velocity cage type blower
- Built-in casters for easy portability
- Programmable timer function
- Cool-down cycle extends component life
- Digital room temp and function display
- Multi-function hand held remote

#QEH1500 - Chestnut Oak
#QEH1501 - Heritage Cherry

NEW

COMPACT DESIGN
