User Manual

Light with USB Controller

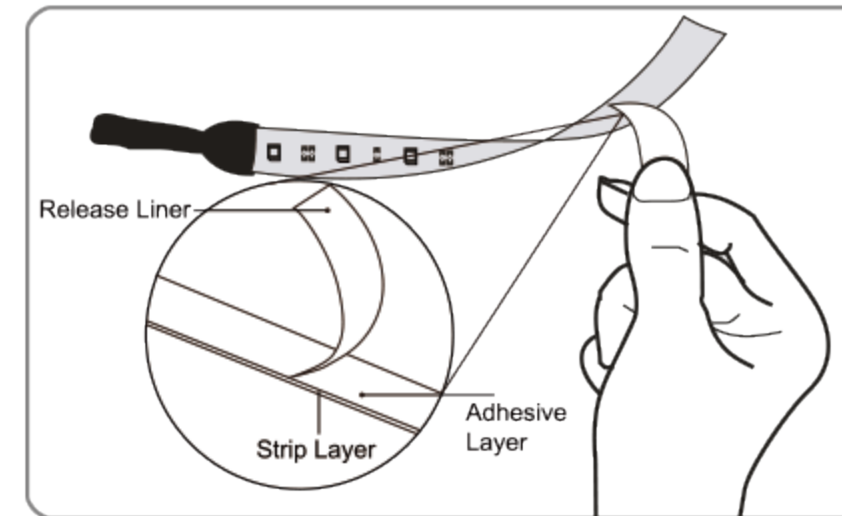

v1.0

How to Install ?

⚠ Please make sure the surface smooth, dry, clean. **DON NOT** stick the led strip on the surface, such as knitted / wool fabrics, dust wall, rough plastic surface, frosted glass.

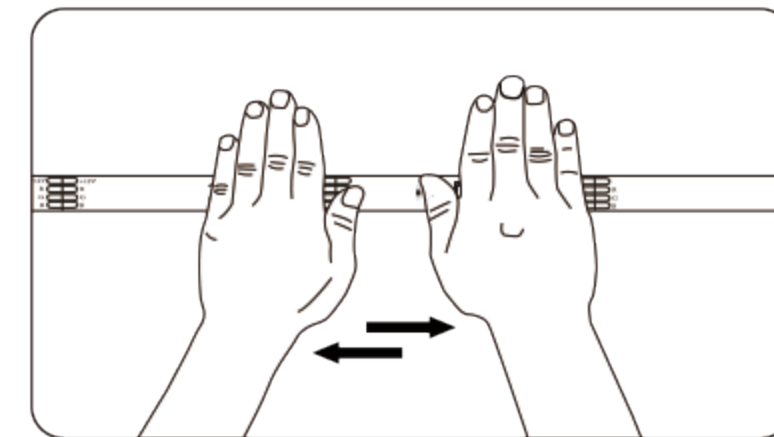

STEP 1

Tear off the plastic on the adhesive tape and stick the strip to any smooth, clean and dry places.

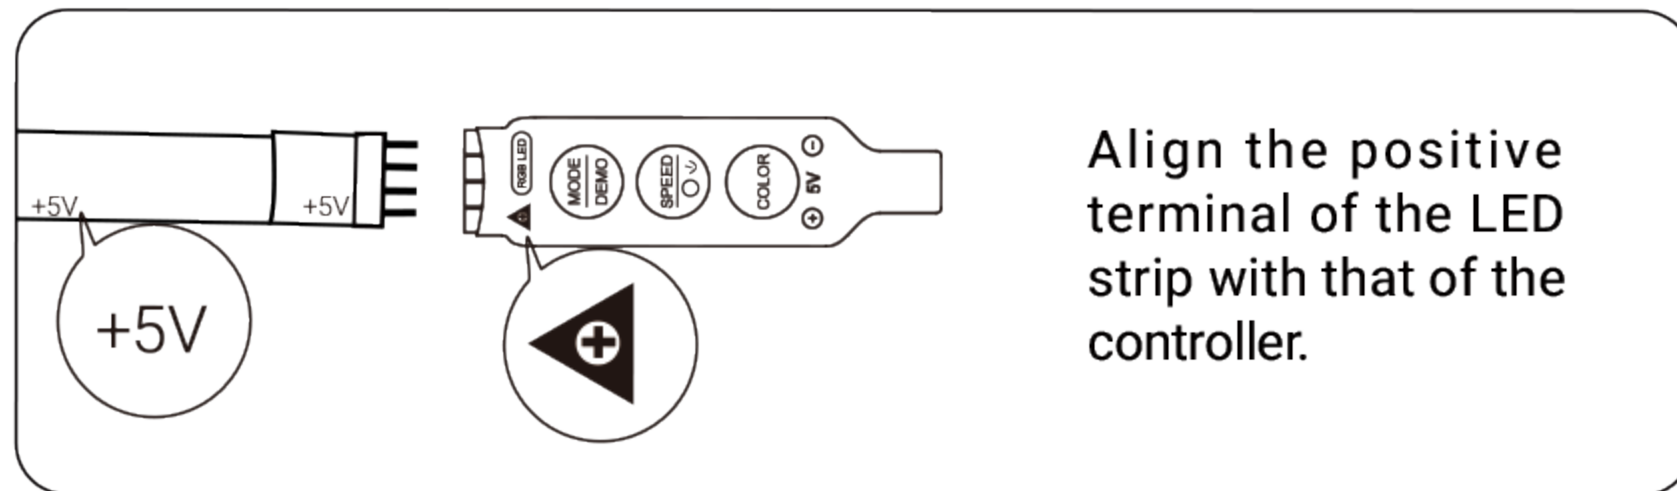

STEP 2

Stick the LED strip and press with force, and then press the whole LED strip repeatedly.

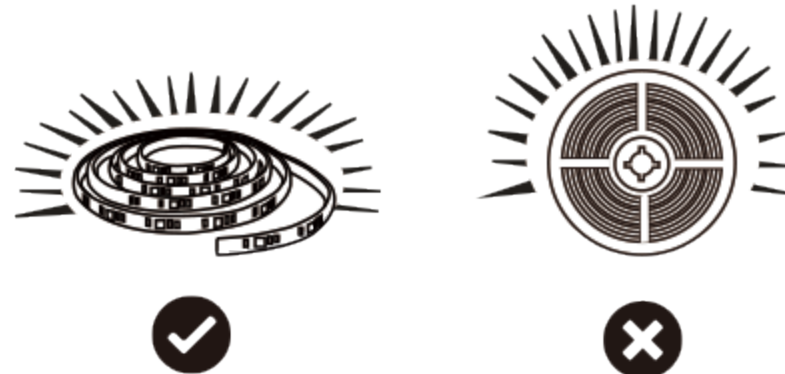

How to Connect ?

Connect the LED Controller with LED Light Strip.

⚠ Please spread out the light strip before connecting the power supply

Introduction

Thanks for choosing our product !

This colorful light has many dynamic modes.

Accompany with our first-class controller, the product performs outstanding colors and magic light effects.

Install

1. Plug in the controller into USB. Please use 5V2A power supply. 5V1A will cause low brightness.
2. If the light can not light up, contact support for help.
3. Unroll the light, put or stick the light where you want.
4. Take care not to tear it broken.
5. Any question or defect issue please contact us.

Troubleshooting All lights don't work.

- Ensure the power is on.
- Check the connector whether is loose or of wrong order.

Customer Service

If you have any questions or product issues, please contact seller via the email on the package or get the product support on the order page in your purchasing account. All messages will be replied within 24 hours.
