

CONGRATULATIONS ON THE PURCHASE OF YOUR NEW MAILBOX.
YOU HAVE MADE A GREAT DECISION!

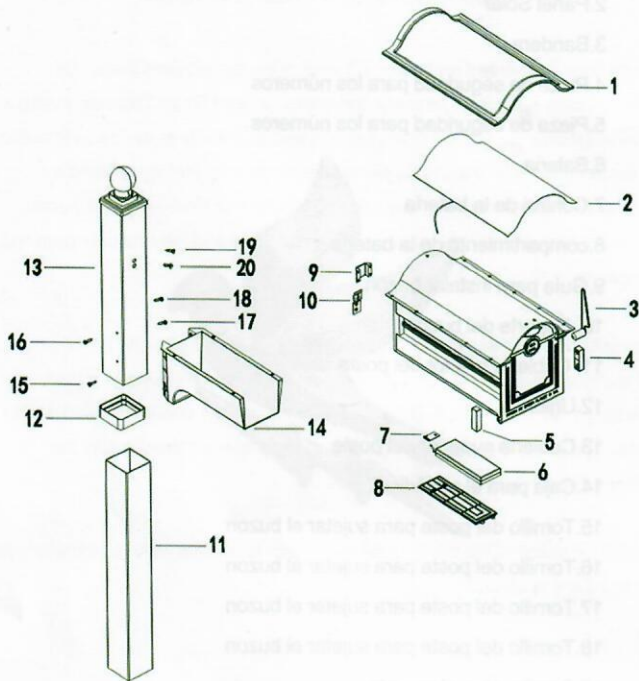

This mailbox is invented and patented after many generations have had difficulties identifying their property addresses at night time. This new mailbox contains exterior illuminated numbers or letters that will help the general public, law enforcement and fire rescue department to quickly identify a home's property address. If there are any natural disasters or there is loss of power, this mailbox would still light up the property address and help rescue team find its locations.

This mailbox is made of heavy duty pvc plastic, and flexible solar panel (the new technology) on its roof that powers an internal battery used to illuminate the property address via L.E.D lights. The numbers are easily identified during the day due to the color and design. But at night is when the value of the mailbox comes alive.

The interior space of the mailbox remains open to receive all correspondences as a standard mailbox.

This mailbox was invented and patented by Efrain Fonseca

ITEMS CONTAINED IN YOUR BOX:

RECOMMENDATIONS: Clean your mailbox with soap and water.

- 1.Solar panel trim
2. Solar panel
3. Flag
- 4.Piece for lock Numbers Right side
- 5.Piece for lock numbers left side
- 6.Battery
- 7.Battery control
- 8.Battery box comparment
- 9.Guide to install mailbox
