Specification

- * Material: PP
- * Load Bearing: 100kg/220.5lbs

Highlights

- * Equipped with water storage tray to provide space for retaining excess water, allowing the roots to fully absorb water and nutrients.
- * The self-watering tray and breathable sidewall ensure that oxygen and water permeate the roots completely.
- * Features removable water blockers on each side to perfectly manage the water level, effectively avoiding rotting and over-drying.
- * Made of reinforced PP material with a rattan pattern, our elevated growth box can hold up to 220.5lbs.
- * Suitable for growing fresh vegetables, mint, thyme, lavender, tomatoes, and other flowers or herbs.
