Stainless Steel Cutting Board Installation & Care Instructions

This board is designed for durability, hygiene, and stability in both residential and commercial kitchens.

INCLUDED IN PACKAGE

Stainless steel cutting board (T304 stainless steel)

Self-adhesive clear silicone non-slip pads (not pre-installed)

INSTALLATION – NON-SLIP SILICONE PADS

The clear silicone pads are included loose and can attach as needed.

Clean the underside of the cutting board with rubbing alcohol and allow to dry

Peel backing from silicone pads

Press pads firmly into place

Allow adhesive to set for 30 minutes before use

USING THE CUTTING BOARD

Place the board flat on the countertop. The 90-degree bent edge should hook securely over the counter edge. The board is designed to remain stable without sliding during use.

CLEANING & CARE

Wash with warm water and mild dish soap

Rinse thoroughly and dry with a clean towel

Dishwasher safe (top rack recommended)

DEEP CLEANING/SANATIZING

Use diluted vinegar, baking soda paste, or food-safe stainless cleaner

For commercial kitchens, approved sanitizing solutions may be used

SCRATCH MAINTENANCE

Light scratches are normal and part of stainless steel wear. Use a non-abrasive pad to blend marks, wipe in direction of grain.

IMPORTANT CARE NOTES

Stainless steel is non-porous and will not absorb odors or bacteria. Scratches from normal knife use are expected and do not affect performance. Avoid using steel wool or abrasive pads if a uniform finish is desired.

Do not use chlorine bleach or harsh chemicals for extended periods.
