Geometric Progression 2

D1214S24265-2260

Geometric Motion II is part of a series of eight geometric drawings that invite the viewer to experience the elegance of minimalist design. These understated compositions showcase line drawing techniques that explore a variety of geometric shapes that highlight the fundamental importance of the line in art.

Geometric Motion 2 features triangular forms that give the allusion of a pyramid. Clean lines and a minimalist approach emphasize the inherent balance and stability of the drawing. The series is reminiscent of Josef Alber's geometric line drawings of the 1950s. Part of ART by TA, Geometric Motion 2 is an exclusive and original work of art.
