wrench

glove

The hardware kit provides:

•The components displayed on each lamp may vary slightly

step 1

① Tighten the connection between the light and the sphere.

Step 2

① Insert the decorative half circle into the decorative piece and tighten it with screws.

Step 3

① Tighten the hanging ring to the lamp body.

5

Step 4

① Tighten the long, short, and decorative tubes to the lamp body.

② Long decorative tube

③ Short decorative tube

6

Step 5

- ① Thread all the wires through the canopy and installation kit.
- ② Connect the power cable with two cable connectors.
- ③ Connect the grounding wire and tighten it with the grounding screw.
- ④ Install the fixing screws into the mounting plate, install the installation unit under the junction box, and tighten with two mounting screws.
- ⑤ Fix the canopy in place using a suspension ring. Tighten the screw ring and hex nut with a wrench to tighten the hex nut.
- ⑥ Tighten the fixing screws on the rain shelter holes.
- ⑦ Swivel the lid onto the canopy.

Step 6

Kind reminder: Before installing the glass tube, please clean it thoroughly .

①② This depends on the height of your ceiling and the desired suspension length. You can measure the chain and adjust the locking buckle to achieve the desired chain length.

③ Tighten the light bulb (E12 maximum 40W, not included).
