

## **6 PIECE EMBER LOG BED KIT INSTALLATION INSTRUCTIONS**

Please place the ember log pieces on the floor of your fireplace and mix with lava rock or any Duluth Forge brand media for a realistic wood burning look. These ember log pieces are a great addition to hide controls or a gas line and improve the overall appearance of your fireplace.

**⚠ WARNING:** Do not place the ember log pieces into or on the gas log set. The gas log sets have been tested to the appropriate agency regulations for safe operation and any additional non-approved logs or ember log pieces can result in poor air quality conditions or sooting.
