

Description

The milk can is made of heavy-gauge stainless steel, which is more durable and lasts for a long time. One-piece can with added support at the bottom and top strengthens its stability. The sealing lid is fastened by three locks so that you don't have to worry about spilling milk or oil even if the can is upside down. The large capacity can accommodate enough stuff. The thick handle with the manual welding process is not easy to fall off from the can, which can bring greater reassurance and durability. It is suitable for storing wet food, such as oil, ghee, milk, wine, and dry food like rice and grain for commercial or domestic use.

Key Features

Great Durability: The milk can is made of heavy-gauge stainless steel and the one-piece design, which is more durable and lasts for a long time.

Strong Closure: The sealing lid is fastened by three locks so that you don't have to worry about spilling milk or oil even if the can is upside down.
