

PRODUCT INTRODUCTION

ToolArtes 3 Step Ladder
Maximum Load: 330 lbs

Before Use

1. Ensure that you are fit enough to use a ladder. Certain medical conditions or medication, alcohol drug abuse could make ladder use unsafe.
2. A safety check should be done before each use of the ladder to ensure it is always in good condition.

Inspections of portable ladders should include, but are not limited to:

- Check the safety of the ladder, whether the ladder frame is damaged, broken, corroded, deformed or cracked
 - Check the condition of the pedals, whether there is mud, oil or grease attached.
 - Whether the safety anti-slip feet are in good condition.
 - Whether the hardware is intact (tie rods, rivets, stays, nuts, bolts, feet)
3. Whether the ladder is functionally suitable for the task.
 4. Ensure that the safe working load of the ladder does not exceed its maximum allowable load.
 5. Remove any contamination from the ladder, such as wet paint, mud ,oil or snow. Ladders should be free of oil, grease, or slippery materials on climbing or gripping surfaces.
 6. Before using a ladder at work, a risk assessment should be carried out respecting the legislation in the country of use.
