

Ledger Tall Cabinet

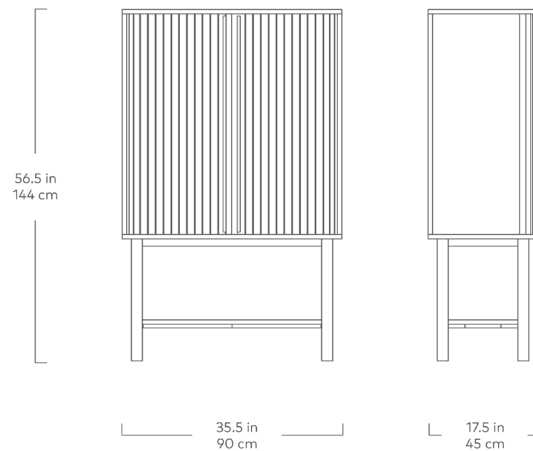

Vintage
Oak

Stylishly reveal or conceal with Ledger, a contemporary storage design that showcases gorgeous tambour wood sliding doors, elegant proportions and skilled craftsmanship. Whether you're looking for a clever solution to conceal clutter or an attractive way to display objects and collectibles, Ledger provides the answer. The tambour doors, which open smoothly into the back of the cabinet, prove that beautiful form follows function, displaying a simplicity of design engineering without the use of hardware and fasteners. Components incorporate graceful curve details and warm woodgrain protected with an all-natural, zero VOC finish. Solid and engineered wood throughout is FSC®-Certified, ensuring material is sourced from well managed forests to support a healthy environment.

Design Trade Professionals: We aim to keep our designs in stock and ready to ship quickly for projects on a tight timeline. Designs may be customized with COM and alternate finishes (minimum quantities may apply). Visit gusmodern.com for more information about our Trade & Contract programs.

Ledger Tall Cabinet

- Features tambour retractable doors with solid wood handles that glide effortlessly into the cabinet, maximizing space efficiency.
- Main structure is constructed with engineered wood core for strength and stability, surface-faced with real wood veneer.
- Cabinet is constructed with FSC®-Certified wood components in support of responsible forest management (FSC® 092551). By purchasing this product you help take care of the world's forests. Find more information at www.fsc.org
- Open doors reveal 2 storage compartments, each equipped with 2 adjustable shelves for efficient storage space.
- One concealed opening in back panel for tidy cable management.
- Vertical center brace for additional stability.
- Durable water-resistant finish.
- Features solid oak legs with a lower shelf for additional storage.
- Felt pads on the bottom of legs to protect hardwood floors.
- Assembles easily with provided hardware. Anti-tipping hardware provided.
- CARB (California Air Resources Board) Phase II compliant.
- Wood is a natural material, with variations in grain pattern and colour that make each design unique.
- It is normal for solid wood to expand and shrink as a result of variations in environmental humidity. A consistent humidity level of approximately 50% is recommended to prevent cracks and surface splits.
