Tools Needs (not included in the package)					
Pencil	Electric Drill	Hammer	Tapeline	Level Ruler	Screwdriver

Mirror introduction

1. Measure the hanger spacing Measure the distance between 2 hangers with a tape measure
2. Mark drilling locations Determine the specific locations of drilling with a tape measure, and mark it out with a pencil.
3. Drill holes with a percussion drill Drill 6-8 mm holes in the wall at marked locations with a percussion drill.
4. Put an expansion tube into each hole and put a screw into each tube Strike expansion tubes into drill holes with a hammer and put screws into expansion tubes with a screwdriver. Leave a 5 mm length out of the wall surface

Take out the 3M adhesive tape and stick it to the designated position on the back of the mirror

**Added Security with 3M Strips
Double Protection for Your Wall**
